

Managing Validator Records

In this example, we will add a validation for a vehicle with the plate number **BIRCH** in the **GARAGE L1 Lot** starting **June 4th** and expiring on **June 4th**.

Enter the **plate number**

Choose Garage L1 as the **Lot Zone**

Enter your time frame and click on **Validate**

Comment

Lot Zone - Select Lot Zone -

Valid Between Dates Jun 04, 2019 16:12 Jun 04, 2019 17:12

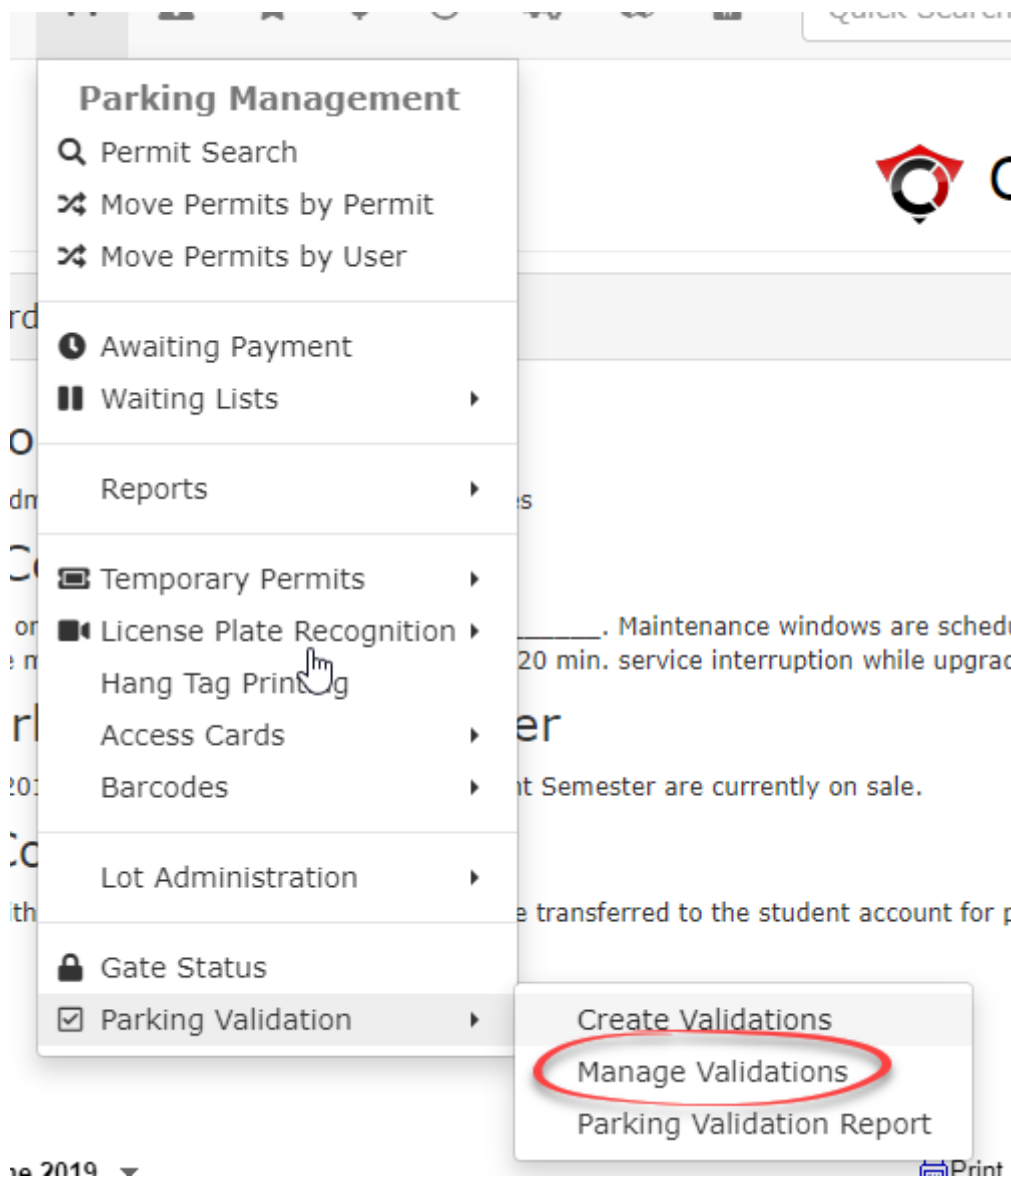

[Validate](#)

Active Parkers [?](#) [Refresh](#)

Once we have created the record, it will appear in the **Validate Parking Report**.

If the entry was done in error, it can be removed through the **Manage Validation** tool.

To do so, hover over **Parking Validation** under the **Parking Management Menu** and select **Manage Validations** from the drop down menu.

In the management tool, enter the **Plate Number** in question along with the **Lot Zone** you wish to view.

To delete the record click on the **Delete** button associated with the record to highlight it with the check mark.

You will be prompted to confirm the archiving of the record. Click **Archive** to continue.

Quick Search

Are you sure you wish to archive the selected records?

A pop-up message will confirm the deletion of the record.

Once the record is deleted, you will notice it will be removed from the **Validator Parking Report**.
