

Branding the Validator Tool

Accessing the Validator Pages to Edit the Look and Feel

From the **System Config** Menu click on **System Messaging**.

A page with two tabs will appear. Click on the **Messages** tab to access the list of editable messages.

Manage System Messaging				
<div> <div>Pages</div> <div>Messages</div> </div>				<div>Create Page/Message</div>
URL	Title	English	Français	Notes
--lots-detail	Lots Detail	<div>Edit</div>	<div>Create</div>	
/	User Dashboard	<div>Edit</div>	<div>Create</div>	The main page after a user logs in
lockers	Lockers	<div>Edit</div>	<div>Create</div>	
login	Login	<div>Edit</div>	<div>Create</div>	User page for logging in.
lots	lots	<div>Edit</div>	<div>Create</div>	
permits	Permits	<div>Edit</div>	<div>Create</div>	
register	User Registration	<div>Edit</div>	<div>Create</div>	
vehicles	My Vehicles	<div>Edit</div>	<div>Create</div>	
violations/appeals	Appeals Message	<div>Edit</div>	<div>Create</div>	

There are three messages to edit for the Validator Tool.

They are:

- The Validator Entry message
- The Validator Manage message
- The Validator Report message

Each of these pages represent the three Validator Tool Pages.

Here's what they look like in the **Message System Editor**.

Manage System Messaging				
				Create Page/Message
<div>Pages</div> <div>Messages</div>				
System Location	Title	English	Français	Notes
admin.validator.entry	Validator Entry	Edit	Create	
admin.validator.manage	Validator Manage	Edit	Create	
admin.validator.report	Validator Report	Edit	Create	
appealDisclaimer	Appeal Disclaimer	Edit	Create	
dashboardMessage	Admin Dashboard	Edit	Create	
footer	Queue for Deletion: Common Footer	Edit	Create	System page footer on all user side pages.
header	Queue for Deletion: Common Header	Edit	Create	System page header on all user side pages.
lockersDisclaimer	Locker Disclaimer	Edit	Create	The content for locker disclaimers

To edit the message click on the **Edit** button

Manage System Messaging				
				Create Page/Message
<div>Pages</div> <div>Messages</div>				
System Location	Title	English	Français	Notes
admin.validator.entry	Validator Entry	Edit	Create	
admin.validator.manage	Validator Manage	Edit	Create	
admin.validator.report	Validator Report	Edit	Create	
appealDisclaimer	Appeal Disclaimer	Edit	Create	
dashboardMessage	Admin Dashboard	Edit	Create	
footer	Queue for Deletion: Common Footer	Edit	Create	System page footer on all user side pages.

The edit page will display.

On this screen you will enter a title for your page as well as an identifier. This identifier must be unique.

You may also select a language setting for your page.

The page can be edited in the WYSIWYG editor where you can visually design the page.

Best practice would be to **maintain the same width** but the **height can be your preference**. Upload the preferred image to your **Files Folder** using the **Manage Files** functionality.

Delete Page

Layouts for messages are currently only used on permit printing pages such as permitPrintableSticker.

Powered by TinyMCE

Words: 5

The `system_code` shortcode is replaced with elements that are used by OPS-COM. They can be things like login forms and notification containers. They allow you to place these elements anywhere on your page that you see fit. If the page is a system page like `/login`, and it doesn't have the shortcode anywhere, it will append it to the bottom of the content page.

It is also possible to edit the page in straight **HTML**. To do so go to the **Tools** menu and click on **<>Source Code**.
