

Forms Admin

Managing Forms

Hover over the **User Management** icon and click **Forms**. From here we have two options to **List Forms** that we have created which will show us the entries for each of these forms. As well as **Add Form** which allows you to setup new forms for your users.

Required Role Permissions

In order for your admins to properly use this functionality, they require you to have them added to or create a new role that has **Edit Forms** and **View Forms** enabled. These are the only permissions required to use Forms.

Editing Permissions: Patrol Officer

<input checked="" type="checkbox"/> View Users	Ability to view Users information
<input type="checkbox"/> Edit Users	Ability to add / edit Users
<input type="checkbox"/> Delete User Aliases	Ability to delete Aliases from a User's Profile
