

Permit Search

In **Parking Management**, hover over the **Permit Management** icon and click '**Permit Search**':

Enter the search criteria. If you are looking for **Archived Permit Data**, enable the checkbox. Click the '**Retrieve**' button. The results will display below the search criteria.

Toggle More Options

Additional permit search options can be found under the "Toggle More Options" button and you can pin these additional options so they appear on the default permit search page next time without having to go into the toggle more options area.

Example:

The screenshot shows a 'Permit Search' form with the following elements:

- Header:** 'Permit Search' title and a 'Toggle More Options' button.
- Filters:**
 - Sale Window:** Dropdown menu set to 'Active Sale Windows'.
 - Lot Name:** Dropdown menu set to 'All Lots'.
 - Permit Number:** Text input field.
 - Match Type:** Radio buttons for 'Partial Match' (selected) and 'Exact'.
 - Permit State:** Dropdown menu set to 'All States' with a help icon.
 - Renewal State:** Dropdown menu set to 'Any Renewal State'.
 - Permit Status:** Dropdown menu set to 'All Permits'.
- Action:** A blue 'Search' button at the bottom.

At the bottom of the page, there is a footer: mander Copyright © 2024 Tomahawk Technologies Inc.

Include Only Active

You are also able to search by active permits only using the **Include Only Active Permits** check box.

A drop-down menu allows administrators to pick from a variety of reports to be generated. Select the report you want and click the '**Perform Selected Action**' button.

The reports include:

- - Generate Mailing List (from listed data)
 - Generate User Usage Report
 - Send Email to Permit Users
 - Generate Status Report
 - Generate Permits for Printing

The **Clock** link displays the Permit History screen that shows the entire permit history and links to the permit details and transaction history for that specific permit. If the permit has been rented by more than one user, you will see more than one user listed here.

The **Toggle Availability** column indicates whether or not that specific permit is visible on the user side. If the checkbox is enabled, the permit is visible to purchase. If the checkbox is disabled, the permit is not visible for purchase. Permits can be marked 'Visible' individually or in bulk by using the 'Mark all Available' or 'Mark all Not Available' buttons. Click the 'Update Records' button to save any changes made.

The **Reserved/Rented** link displays details about the user who has reserved/rented the permit with a link to view/edit their profile and a link to email the specific user. Reserved means that the permit has been requested but there is no payment made or promise to pay on file yet. Rented means the permit has been reserved and a promise to pay is on file.

- **Requested** is when a user has selected an item but has not yet selected how it will be paid for
- **Reserved** is when there is an associated unprocessed payment (promise to pay; eg. cheque)
- **Rented** is when the payment is processed and linked to a processed payment

Permit Counts Explained

When viewing your Permits either in permit search or the listing in Permit Allocate there is a legend across the top that indicates a count for various states of permits in the lot.

- **Total** = Total found by search
- **Requested** = State is Good, Payment is Null, User associated to permit
- **Rented/Reserved** = State is Good, Payment associated (doesn't have to be processed)
- **Visible To User** = State is Good, Lot & Permit is Visible, No user associated
- **Visible to Admins** = State is Good, Lot OR **Permit is Hidden**, No User associated
- There's an option that is available that may show another number with Visible to Admins: State is Good, Lot OR Permit is Hidden, User IS associated.
- **Unavailable** = State is Not Good or Valid Or Usable.

Total Permits: 10	Requested: 2	Rented/Reserved: 5	Visible To User: 2	Visible To Admins: 4	Unavailable: 1
----------------------	-----------------	-----------------------	-----------------------	-------------------------	-------------------

Email Listed	Mailing List	Status Report	Copy	CSV	Excel	PDF	Print
--------------	--------------	---------------	------	-----	-------	-----	-------

STAFF1007	-CSL [M] Company Staff Lot	\$30.00	<input checked="" type="checkbox"/> Available	Company Staff	Requested Release Switch	Good
STAFF1008	-CSL [M] Company Staff Lot	\$30.00	<input checked="" type="checkbox"/> Available			Good

The **Release** link allows administrators to disassociate a permit from a user. This allows it to be resold.

Take Note

Releasing a permit does not affect the payment transaction. If money needs to be refunded, administrators must do a financial adjustment as well.

The switch **link** allows administrators to change the permit number associated with a user. The **Permit Number** link displays the 'Parking Permit Information' screen. On this screen you can change the Permit State and look at the User Profile associated with this permit. You can also see the Payment Details. If the payment has been received you can click on the 'Processed Date' link to view more details. Click the 'Update Permit State' button to save any changes you make.

Parking Permit Information
