

# SchoolPay

## Add a new Payment Type:

You can create a new payment type by selecting **System Configuration** → **Payments** → **Setup Payment Types** → **Add Type**.

If you don't see "Setup Payment Type" as shown above you may need to give your [role the permission](#) to do so.

The screenshot shows the 'Manage Administrator Roles' page. On the left, a sidebar menu has 'Admin Management' expanded, with 'Manage Roles' highlighted. A callout box points to 'Manage Roles' with the text: 'Edit the permissions of the role your admin account is part of'. In the main area, a table lists administrator roles. The 'System Administrator' role is selected, and its 'Permissions' are being edited. A callout box points to the 'Permissions' column header with the same text: 'Edit the permissions of the role your admin account is part of'. On the right, the 'Editing Permissions: System Administrator' panel shows a list of permissions. The 'Edit Payment Types' permission is highlighted with a callout box. Above this panel, a toolbar contains various icons, including a dollar sign icon which is also highlighted with a callout box.

Select "**SchoolPay - Hosted**" as your provider → **Next Step**.

The screenshot shows the 'Add New Payment Type' dialog box. The 'Provider' field is set to 'SchoolPay - Hosted', which is highlighted with a callout box. Below the provider field, there is a description: 'Redirect the user to a payment form using SchoolPay before being sent back to OPS-COM.' At the bottom of the dialog, there are 'Close' and 'Next Step' buttons. The 'Next Step' button is highlighted with a callout box. In the background, the 'Payment Types' table is visible, and an 'Add Type' button is highlighted with a callout box. A text box with an arrow pointing to the 'Add Type' button contains the text: 'Select "Add Type" Then select a payment provider and click next step.'

## Edit Payment Type User Types:

You should now be brought to the "**Edit Payment Type**" page:

## Edit Payment Type

Add/update payment type

Update Payment Type

2

Select the user types that will be able to use this payment method. Students, staff, contractors, etc.

**Type Name:** The type name can be whatever you want it to be, though please note this will also be the name displayed to users when using payment checkout and selecting a payment method. You can reference the specific hosted payment provider such as SchoolPay or something more generic such as "Online Credit Card Payment", "Online payment", "Credit Card", etc. Really it's up to you and what you think makes most sense to your site users when making a payment, also might depend on what payment methods your SchoolPay account supports.

**Enabled for User Types:** Select the User Types you wish this new Payment Type to be visible to so they can select it during payment checkout. You can change these user types at any time

## Edit Payment Type Settings:

There are additional required configuration fields in the **Settings** area:

# Edit Payment Type

[Back](#)

Type Name

SchoolPay

Description

Credit Card via Hosted Payments with SchoolPay

[Enabled For User Types](#)

Settings

Enable for Text2ParkMe

This payment processor is not available for Text2ParkMe.

Enable for Permit Renewal Payments

This payment processor is not available for Automated Permit Renewals.

Enable for Guest Payments

Can Change Type After Being Process?

This payment type cannot be changed once the payment has been made.

Prompt Information

Email Address

The email address allows for receipts to be sent back to the user when paying as a guest.

## Credentials

Username

Password

Item ID

Production/Sandbox

**Enable for Text2ParkMe:** This payment setting isn't currently supported using OPS-COM SchoolPay integration.

**Enable for Permit Renewal Payments:** This payment setting isn't currently supported using OPS-COM SchoolPay integration.

**Enable for Guest Payments:** if you aren't using this feature leave the button unchecked.

**Prompt Information:** Only "Email Address" is supported with SchoolPay Hosted Payments at this time.

**Credentials:**

- **Username:** Obtained from SchoolPay.
- **Password:** Obtained from SchoolPay.
- **Item ID:** Obtained from SchoolPay.
- **Production/Sandbox:** Select whether you are using your SchoolPay Production/Live credentials or Sandbox/Testing credentials. Additionally, although not required you may find your OPS-COM preview space helpful for testing Sandbox/testing credentials, this way you can keep your production/live OPS-COM data (permits, users, payments, violations, etc) clean/separate during any testing.

Don't forget to save your new payment type by clicking the "Update Payment Type" button along the bottom of the page:

Update Payment Type

Nothing further needs to be done, however if you are curious what the user process looks like when purchasing something in OPS-COM using SchoolPay a number of screenshots are below to show this.

## User flow screenshots:

User selects SchoolPay payment type in OPS-COM and supplies an email address for identification and email receipt:
