

# Search by Plate

## Search by Plate Menu Option

Hover over the '**User Management**' icon and then **Vehicles**. Click '**Search by Plate**'.

The '**Search By Plate**' screen displays.

In this interface you can search for a specific plate or you can enter a vehicle description.

Possible Search criteria:

**Plate:** You can search by the full plate number or a partial number (see fuzzy search below)

**Make:** Vehicle Make (Such as Honda, Ford, Tesla, etc)

**Type:** Vehicle type (Such as hatchback, sports car, compact)

**Colour:** Vehicle Colour (Such as Red, Blue, Grey, Silver)

The date range is optional and refers mainly to the Pay station parking and LPR events shown in

the report. If you leave it blank you will get any instance of the vehicle over it's history.

Click the '**Search Vehicles**' button to launch the search.

image not found or type unknown

- Click the to see the Vehicle History Log.

image not found or type unknown

- Click the to see details of the vehicle associated with the plate.
- Click the **plate link** to enter a new violation associated with that plate.
- Click the **username link** to edit the user profile for that user.
- Click the **envelope icon** to email the user.
- Click the **number of violations** to search and view/edit all previous violations associated to the vehicle.
- Click the **number of incidents** to search and view/edit all previous incidents associated to the vehicle.

# Search by Vehicle Description

If we do not know the vehicles plate number we can search by vehicle description. In this example we are looking for a Grey Ford Hatchback.

## Search By Plate

# Performing a Fuzzy Search

In this example we only have a partial plate and a description. WE can toggle on Perform Fuzzy Search where the system will list vehicles that meet these partial bits of data. IN the following example the officer only caught a partial plate of an individual speeding on campus (**Plate:** APVK???, **Colour:** Grey, **Type:** Hatchback) and wishes to issue a warning.

Note the **APVK**189 plate appears as well as Pay Station instance for **APVK**123 where it has found the APVK via fuzzy search.

## Search By Plate
