

Unlink User and Vehicle

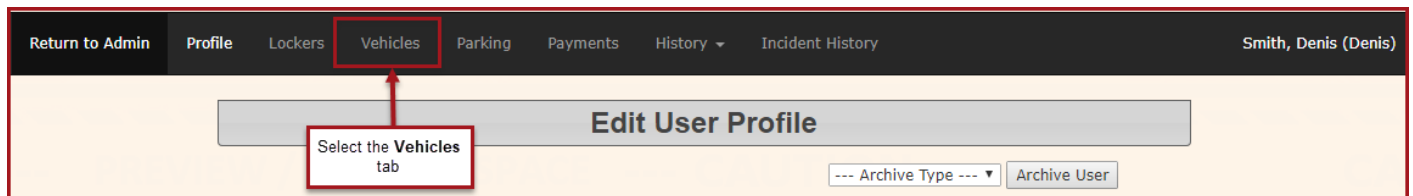

Unlink a User and Vehicle

To remove a vehicle from a user profile, follow the steps outlined below.

Perform a **User Search** to pull up the User's Profile that you wish to remove a vehicle from.

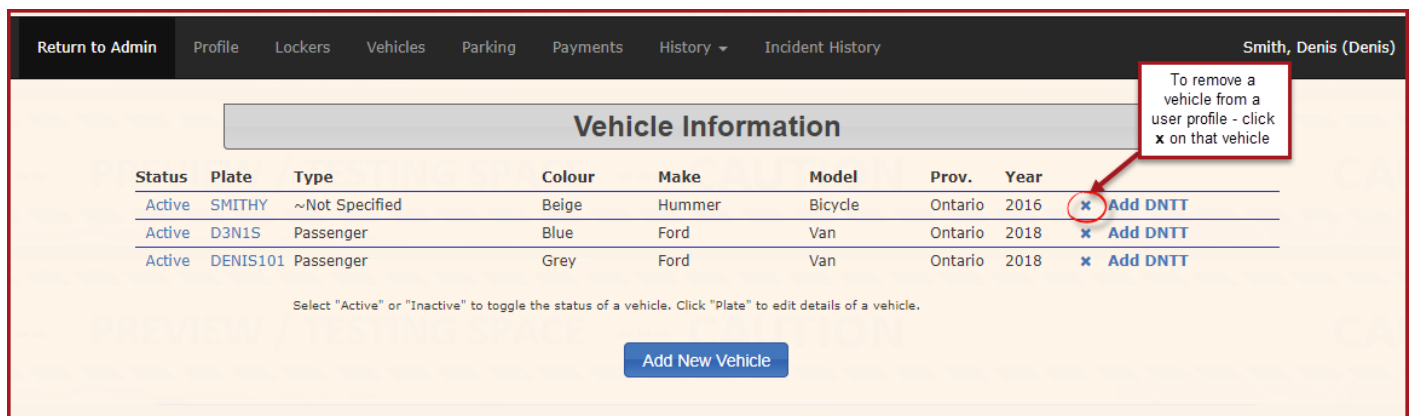

Select the profile of the desired user from your **user search**, and click on the **Vehicles** tab.

The page will refresh, and the list of vehicles associated with the user will appear.

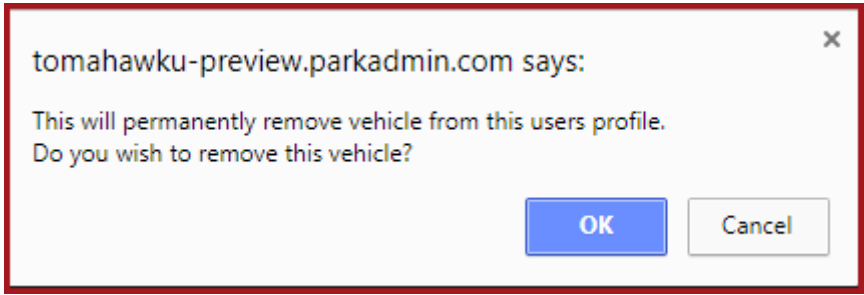

The vehicle list gives administrators the ability to add, edit, create a DNTT, and/or delete a vehicle from a user's profile.

Find the vehicle that you wish to remove from the user's profile, and click the "X" (located to the right).

A confirmation pop-up window will appear.

Click **OK** to confirm removing the associated vehicle, or click **Cancel** to return to the vehicle list without changing anything.
