

Using Permit Proration

Configuration/Setup

In Lot Admin and Pricing go into the lot you wish to setup for **Proration**.
On the Standard permit tab select **This lot can be prorated**.

The screenshot shows the 'Standard Permits' configuration tab. At the top, there are navigation tabs: General, Zone & Location, Standard Permits (active), Temporary Permits, Flex Permits, LPR Settings, and Additional Settings. Below these, the 'Default Cost' is set to '\$ 0.00'. The 'Proration' section has three radio buttons: 'Enabled' (selected with a checkmark), 'Use Default Setting', and 'Disabled'. A descriptive text below states: 'Enables proration for this lot. Once enabled, admins can prorate the permit. This is required to enable proration for users.' The 'Proration For Users' section has three radio buttons: 'Enabled', 'Use Default Setting' (selected with a checkmark), and 'Disabled'. A descriptive text below states: 'Grants the ability for users themselves to have their permit price prorated based on the current day without the need for an administrator to do this for them.' The 'Proration Status' section shows two buttons: 'Proration: Enabled (Override)' in green and 'User Proration: Enabled (default)' in light blue. Below a horizontal line, there are three toggle switches: 'This lot can be used for a second permit' (checked), 'Allow the use of a waiting list with this lot' (checked), and 'Only Allow waiting list after lot is full' (unchecked). At the bottom, there is a 'Lot Category' text input field.

This lot is now set for proration.

Using Proration for Permits

Search for a user and bring up their profile. In our example we are looking for the user **mashbury**.

Click on the **Parking** tab to begin the process of buying a permit.
