Adding Plate Types

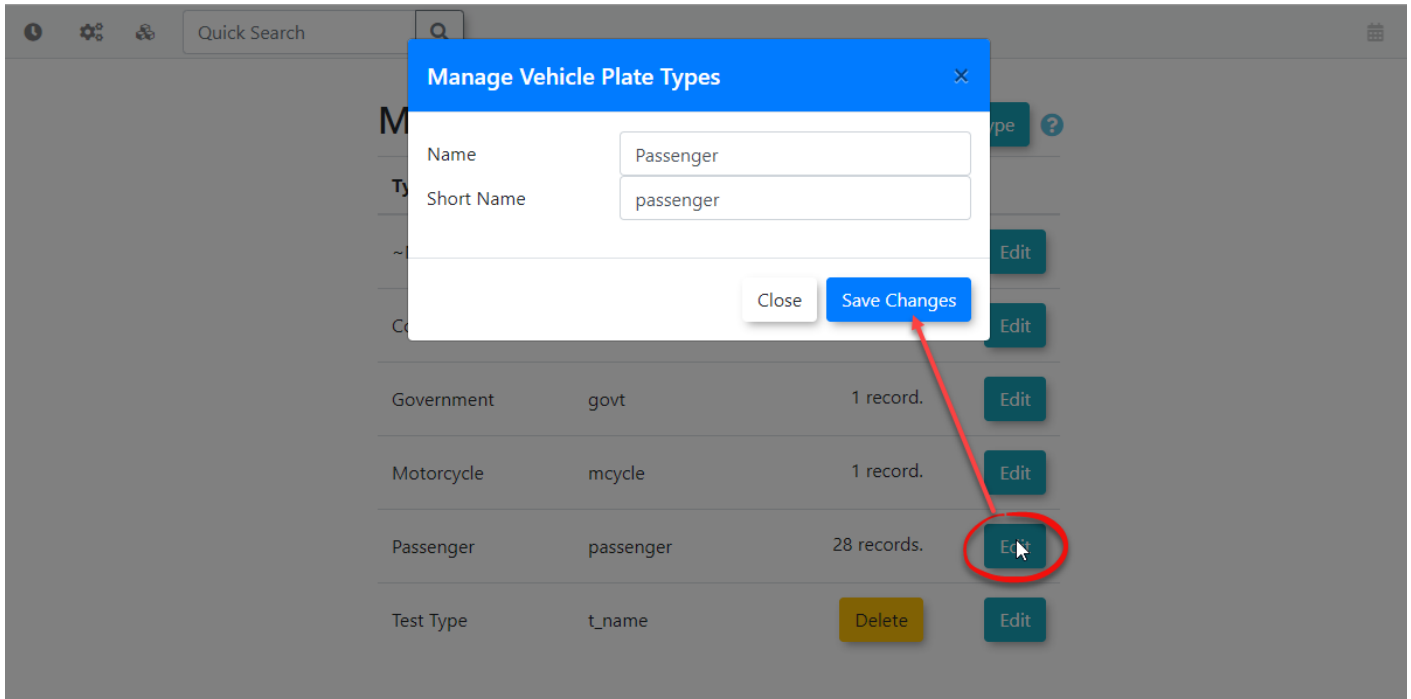

To add a new plate type click **Add Plate Type** and complete the two required fields followed by **Save Changes**. The **Short Name** is used with handheld devices.

The screenshot shows a modal window titled "Manage Vehicle Plate Types" with a close button (X) in the top right corner. The form contains two input fields: "Name" with the placeholder text "Type Name" and "Short Name" with the placeholder text "t_name". At the bottom of the modal, there are two buttons: "Close" and "Save Changes". The "Save Changes" button is highlighted with a red circle. In the background, a table of existing plate types is visible, including Government, Motorcycle, and Passenger types with their respective short names and record counts.

Type	Short Name	Records	Action
Government	govt	1 record.	Edit
Motorcycle	mcycle	1 record.	Edit
Passenger	passenger	28 records.	Edit

Editing Plate Types

To edit plate types click the **Edit** button next to the plate type you wish to make updates to. This will open a new modal window allowing you to change the existing name and short name for that plate type.

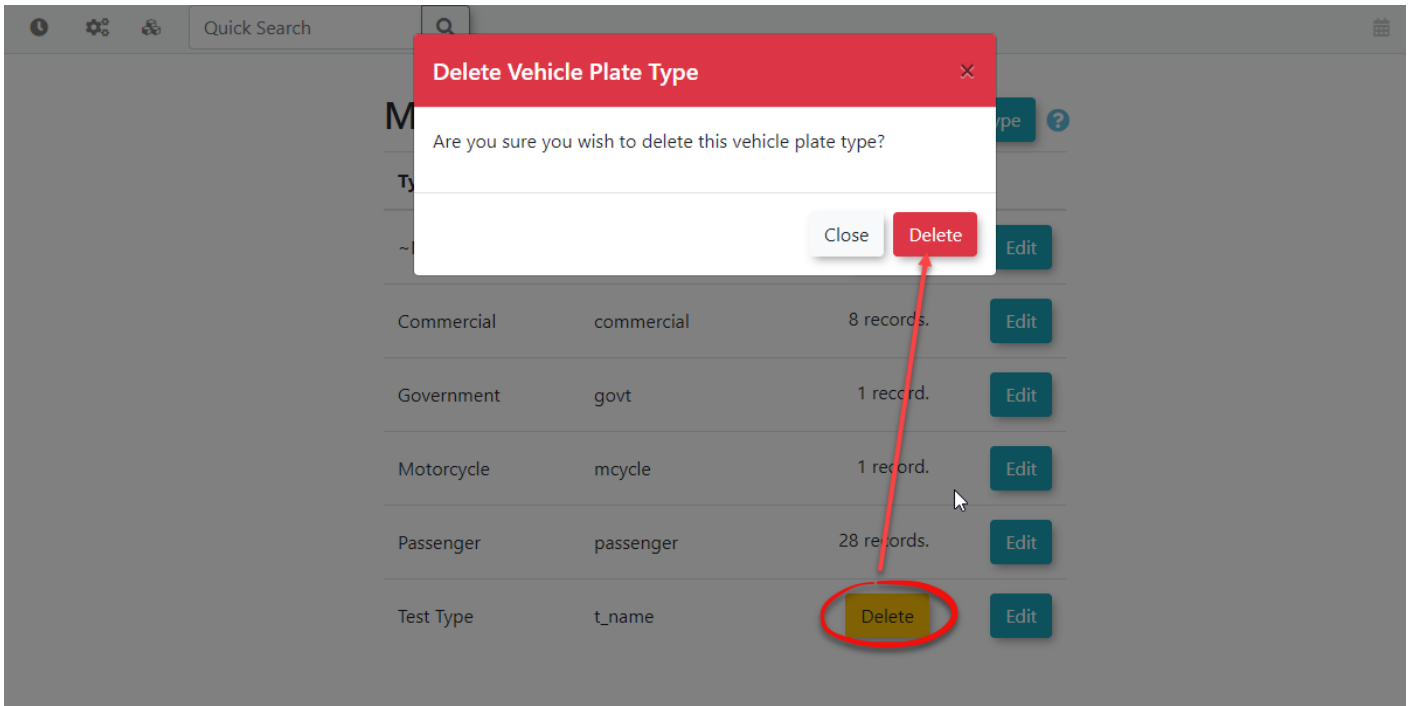

Deleting Plate Types

To delete plate types simply click the **Delete** button next to the plate type you wish to remove from the list. A modal window will appear asking you if you are sure you wish to delete this vehicle plate type.

Important

In order to delete a vehicle plate type it must not be used in the system. Admins will first need to make sure that no users are using this plate type before it can be removed. This is to prevent vehicles from having blank information by deleting these plate types while they're in use.
