

Violations From Static Cameras / Mailout Violations

Violations/Infractions can be created from a report that looks at chalk records. Before this can work, ensure that OPS-COM has set your static cameras up with the necessary settings to report on the lot group and gps location of the camera. Some cameras report on more vehicle information than others. This can be helpful in the report later.

The next setup would be to map your Lot Groups to the appropriate Offence Location:

The screenshot shows a web browser window with the URL `/admin/config/permits/lot_groups`. The browser's address bar and tabs are visible at the top. The main content area is titled "Lot Groups" in a blue header. Below the header, there are several form fields: "Lot Group" (containing "P7 General"), "Free Parking" (empty), "Offence Location" (with a dropdown menu open showing options: "None", "Lot 14", "Lot 3", "Lot 4", "Lot 5", "Lot 6", "Lot 7", "Lot 8"), "Vehicle Count", and "Mistall Zone ID". A map is visible at the bottom left of the form, with "Satellite" and "Map" buttons. The "Offence Location" dropdown menu is currently open, and "Lot 7" is highlighted. The browser's sidebar on the right shows "Edit" buttons for each field.

With this set up, logs will be available as they come in:

Annotations:

- The plate on the chalk record
- Which lot group the chalk is for
- Duration in minutes between entry and exit
- Left = The entry camera and time
- Right = The exit camera and time
- The number of past violations
- If the plate has an alert

Vehicles can appear in one of three formats. No existing vehicle record, a single vehicle record, or multiple vehicle records. They will change the violation creation screen as follows:
