# Violations From Static Cameras / Mailout Violations

Violations/Infractions can be created from a report that looks at chalk records. Before this can work, ensure that OPS-COM has set your static cameras up with the necessary settings to report on the lot group and gps location of the camera. Some cameras report on more vehicle information than others. This can be helpful in the report later.

The next setup would be to map your Lot Groups to the appropriate Offence Location:

With this set up, logs will be available as they come in:

Report type will contain all available filters that we support at the time.

- No Permit & Over Lot Time - This option will only list vehicles where they have no permits and the duration exceeds the lot group's free parking time.

The following is an explanation of each field.

The plate on the chalk record

Which lot group the chalk is for

Duration in minutes between entry and exit

Left = The entry camera and time
Right = The exit camera and time

The number of past violations

If the plate has an alert

Vehicles can appear in one of three formats. No existing vehicle record, a single vehicle record, or multiple vehicle records. They will change the violation creation screen as follows:

Clicking a row will display the violation entry form.

The entry and exit cameras will show the chalk image associated to this entry:

106 chalk records found.

Plate	Validation	Lot Group	Entered	Exited	Mins
C		Campus Entry/Exit	⏩ Mon, 4:55:21 PM - ___IN	___OUT - Mon, 5:03:10 PM ⏩	7
B		Campus Entry/Exit	⏩ Mon, 3:05:20 PM - ___IN	___OUT - Mon, 4:58:05 PM ⏩	112
