Push API: User Create/Update

API access is a paid feature and must be granted by OPSCOM. Email your Account Executive to negotiate access.

The OPSCOM Controller provides a simple JSON based API to integrate with. Clients use this API to push to OPSCOM new users and update existing users directly from another system. For example, you may wish to push Student and Staff information from Banner directly to OPSCOM.

Make sure you set the HTTP Content-Type header to be application/json.

Making API Requests

Raw Request:

```
