

Hotspot - Permits Integration

To configure a lot to work with the HotSpot app, you must configure a zone for any lot where you want this service to be available. Once a zone is associated with a lot or multiple lots, any user purchasing a permit through HotSpot would be valid in all lots associated with the that zone which is configured in Lot Administration. This article will illustrate how to create the zone and apply it to a lot.

Setting up a HotSpot zone

To begin you must set up the zone under **Admin Options**. Hover over the **Parking** menu item and select **Lot Zones** from the drop down list.

In the **Manage Lot Zones** screen click on **Add** to access the add zone form

Manage Lot Zones

Select A Zone ▼

Add

Edit

Enter the name of the lot zone you wish to add. In our example the lot zone is **1001**

Manage Lot Zones

Select A Zone ▼

Add

Edit

Zone Name: 1001

Add Zone

Once you have the zone name entered, click on **Add Zone** to save your selection. It will now show up in the drop down list of zones.

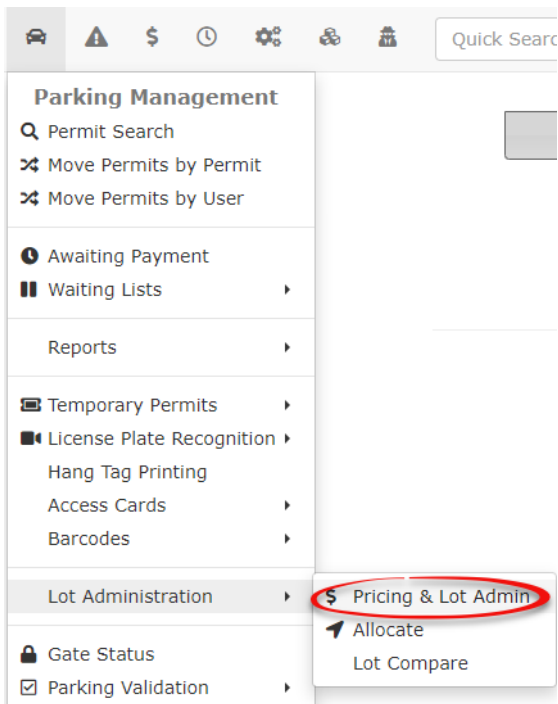

Manage Lot Zones

Applying a Zone to a Lot

To apply this zone to a lot, you first need to go into **Lot Administration** to add the zone to your selected lots.

To access the lots, go to the **Parking Management** menu and hover over **Lot Administration**. Select **Pricing and Admin** from the resulting drop down menu.

In our example we will add this zone to the lot called **Green Staff Lot East**. Click on the **lot name** to access the configuration tool.
