

Reinstalling OPS-COM for Android

Step one - Uninstalling

To uninstall the OperationsCommander app for Android follow these steps.

From the main applications select Settings

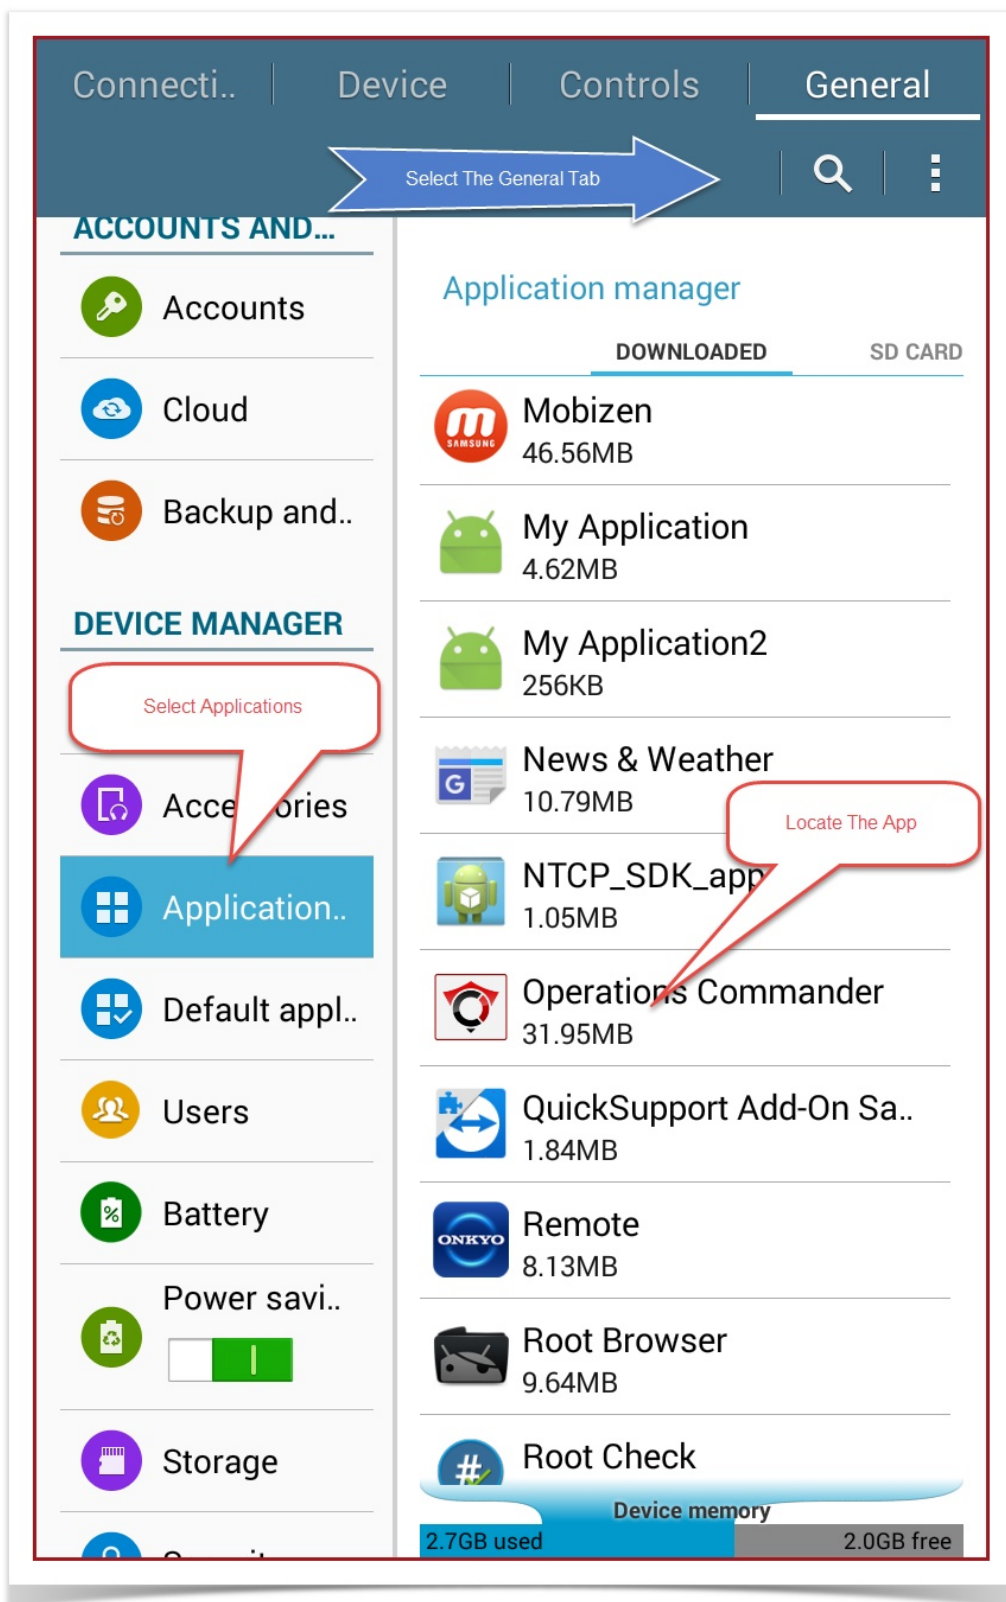

Once in settings:

Select the General Tab.

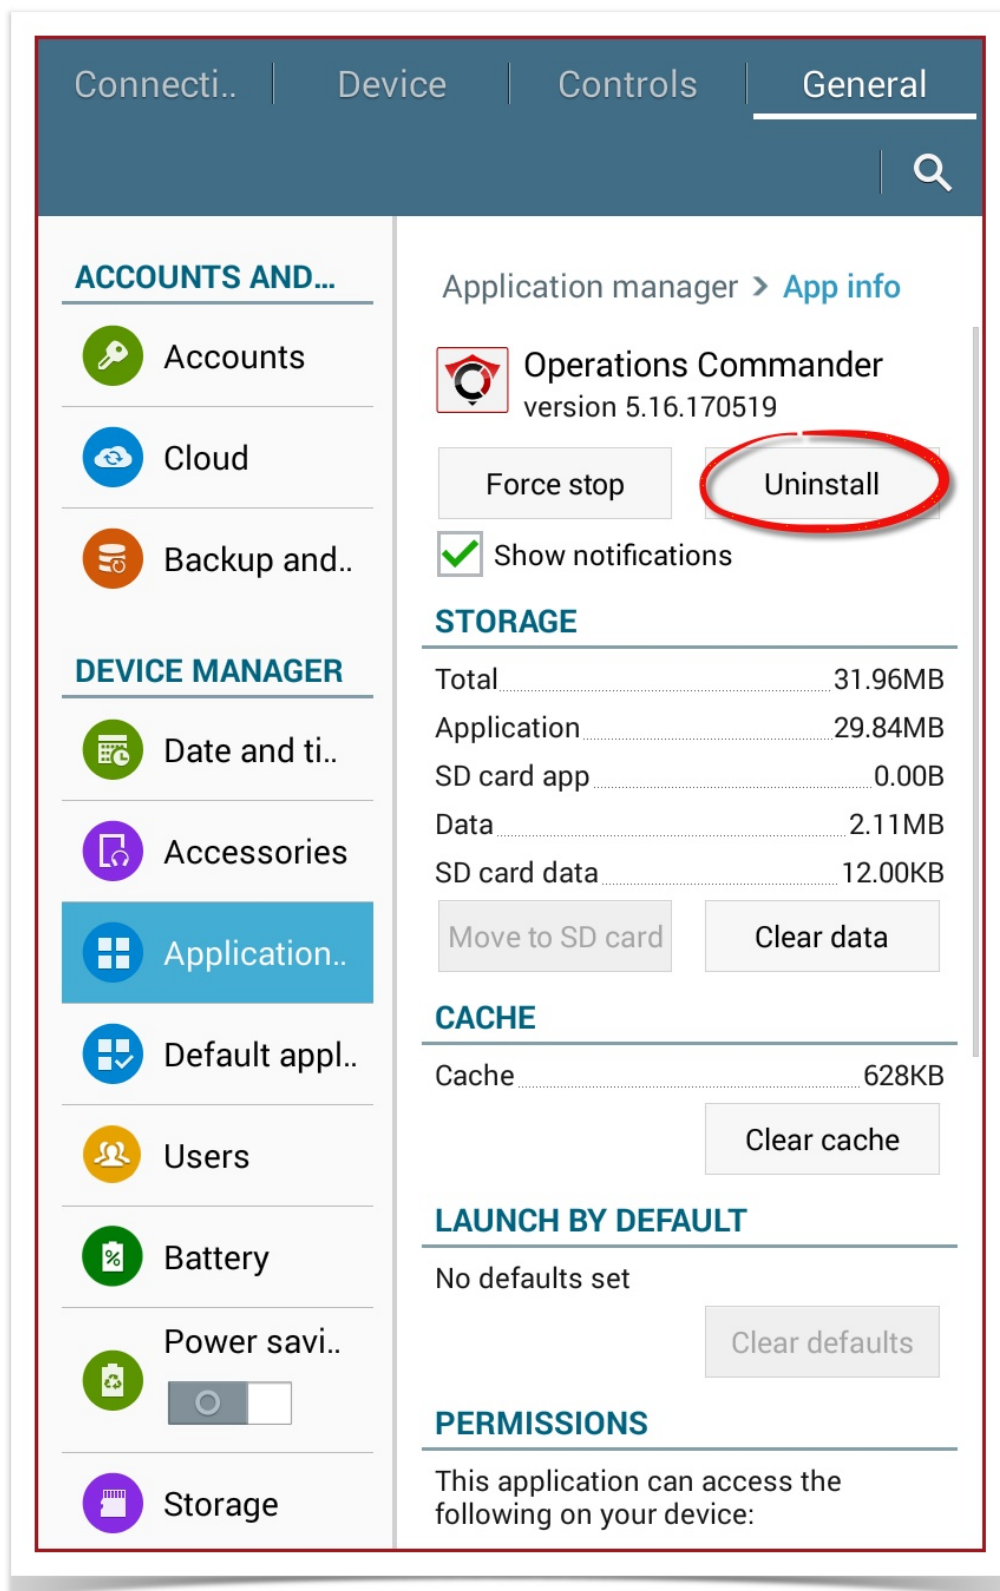

Under Device Manager on the Left of the screen Tap Applications to bring up a list of Apps on the right.

Locate the OperationsCommander application in the list.

Tap the application to bring up the following screen:

Tap Uninstall to remove the application from the unit.

Step two - Reinstalling

Please see [Manual Update or Installation](#)
