

Updating Incorrect LPR Reads

On the **OperationsCommander** Android application, tap the LPR Scanning menu item to open the PL8-RDR LPR Scanning window.

When patrolling a list of plate reads will appear.

NOTREAD NK2924	NK2924	TT-mobile	65.0

Find the plate that has been incorrectly read. Enter the fix to the plate, in this case the plate read as VZ7281, but the actual plate was BVZT282.

Notice the LPR mode goes into OFF mode when adjusting plate reads.
