Lot Passwords

WIP

Added the ability to put a password lock on a lot to prevent users from booking a permit in that lot unless they know the password.

Lot Edit Page

- Added a toggle to enable/disable passwords
- Added an input for the lot password

Permit Reservation

- A middleware has been added to the reservation pages for permits on the user-side. When a lot is password-locked, users trying to access it will be forced to a password input. They will need to enter the password in order to be able to get to the permit reservation page.
- Once the password had been input, the user will not need to enter the password again for that single lot until their session data is cleared.
- Should only apply to the single lot the password was entered for. Other lots with passwords should still prompt the user for the password.
- Applies to:

- “
 - QR/Guest booking (this is only relevant to the real-time map, which uses the guest checkout)
 - Temp permit booking
 - Standard permit booking

Other

- When a lot has a password on it, a lock icon will appear next to the lot name in places where it appears.
- This includes lots that appear on the real-time map.
- Even if a lot has a password, the password will not be enforced unless the password use is enabled for that lot.
- Passwords cannot be enabled for a lot when there is no password set for the lot.
- Admins are not restricted by lot passwords on the admin-side, and will not need to enter the password to book a permit for a user

Lot Visibility Settings

Introduction

Lot visibility has been changed to have three options:

- **Hidden** - lot is not visible and not available to book permits from
- **Visible** - lot is visible and can be booked from
- **Hidden But Accessible** - lot is not visible, but can still be booked from if the user accesses it through a direct link, such as from scanning a QR code

Lot Edit Page

- Changed checkbox for visibility into three radio buttons with one for hidden but accessible

View all Lots Page

- Changed the visibility checkbox into three radio buttons.
- Allows the user to change the visibility status of multiple lots at once.

Other

- Lots that are hidden but accessible will no longer appear for users on the permits page or the real-time map.
- Need to confirm the booking pages do not show lots marked as hidden but accessible, but permit booking is still allowed by direct link.
- Applies to:
 - QR/Guest booking (this is only relevant to the real-time map, which uses the guest checkout)
 - Temp permit booking
 - Standard permit booking
- When looking at the permit booking page on the admin-side for a user, hidden lots will still be hidden when using the 'user's default lots' view, as this list represents what the user would see when booking a permit on the user side.
- Select the 'all lots' option in the menu to view hidden lots, including hidden but accessible lots.
