Disable Browser Auto-fill and Auto-Complete

How does this setting affect OPS-COM?

When using OPS-COM to complete User Profile, we are filling out forms with information for other people that is different each time. Auto-complete can become a nuisance by filling in fields you don't want filled in or even popping data that you don't notice. This data gets saved in the profile by mistake. To avoid this issue, we suggest turning off this feature in your browser.

See the screenshot below:

The screenshot displays a 'Quick Registration Form' with a 'Personal Information' section. The form includes a checkbox for 'Allow user login and mark' and several input fields. A red speech bubble points to the 'Username' field, which contains the text 'yourUsername'. The other fields are filled with placeholder text: 'User Type' is a dropdown menu, 'Password' is 'yourPassword', 'Email Address' is 'yourEmail@yourDomain.com', 'Salutation' is a dropdown menu, 'First Name', 'Middle Name', and 'Last Name' are empty text boxes.

There are also some plug-ins that can cause this issue. Password keepers for example are essentially auto-complete utilities. If you are still experiencing similar auto-complete issues after turning off auto-complete you may want to review your installed plugins to see if turning them off fixes the problem.

How to Disable Auto-fill

Please find general instructions for checking and turning off your auto-complete settings based on various browsers below:

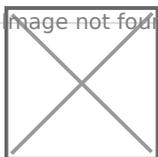

image not found or type unknown

Turn off auto-fill in Internet Explorer

1. Click on the Tools menu icon.
2. Click on Internet Options and select the Content tab.
3. In the Auto Complete section, click on Settings.
4. Uncheck Forms and User Names and Passwords on Forms.

image not found or type unknown

Turn off auto-fill in Edge

1. Open Edge and click on the more icon (three dots) at the top right of the window.
2. Click on Settings and scroll to the bottom until you see Advanced Settings
3. Look for Save Form Entries and click on the switch to set it to off.

image not found or type unknown

Turn off auto-fill in Chrome

1. Open Chrome.
2. At the top right, click More Settings.
3. At the bottom, click Show advanced settings.
4. Under "Passwords and forms," uncheck "Enable Autofill to fill out web forms in a single click."

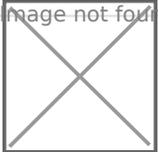

image not found or type unknown

Turn off auto-fill in Firefox

1. Open Firefox.
2. In the address field, type `about:config` and click on "I'll be careful, I'll promise"
3. Look for the following entry `dom.forms.requestAutocomplete`
4. Double-click on it to set its value to False.

image not found or type unknown

Turn off auto-fill in Safari

1. Click Safari, Preferences and click AutoFill.
2. Turn AutoFill on or off: Select each type of information you want Safari to fill in, and deselect the rest.
3. Change or delete autofill information: Click Edit for the type of information you want to change or delete.

Editing the Landing Page Messages

What is the Landing Page?

When you sign in to OPS-COM initially, you are presented with a landing page. This message is referred to as the **Admin Dashboard**. This landing page can be modified or edited to allow organizations to display important information to System Administrators and staff.

Communication Items

Some items to add to this page:

- Pricing Information
- Contact Information
- Scheduling Information
- Organizational Information
- Legal Notices
- General Information

Editing the Landing Page

This is typically the default look of the Admin Dashboard message. It appears as the primary landing page after a new installation. Your support information is maintained by the OPS-COM team. You can change any text in the Admin Dashboard box.

Admin Dashboard

Welcome to OperationsCommander Admin Landing Page

"Important Notices"

This version of **OperationsCommander** is our demo environment. The details of this page are fully customizable in the "System Config Menu" (gears icon) under the "Manage System Messaging" option.

Staff Schedules

You can use these sections for any number of uses such as Staff schedules

Officer	Mon	Tue	Wed	Thu	Fri	Sat	Sun
Kevin	7-6	7-6	7-6	7-6	7-6	Off	Off
Mary Beth	12-8	Off	Off	12-8	12-8	9-5	9-5
Don	Off	12-8	12-8	9-6	10-7	Off	Off
Jerome	Off	Off	Off	Off	Off	8-4	8-4

Spring Schedule?

Current Parking Session

Our current parking session is April. May permits will be made available soon.

Your contacts for Tomahawk

The contacts we have on file for you are:

Phil MacCallum, 855.410.4141 X224
phil.maccallum@ops-com.com?

Premium Support from Tomahawk

Monday - Friday
9:00 am - 5:00 pm

Email support at support@ops-com.com.

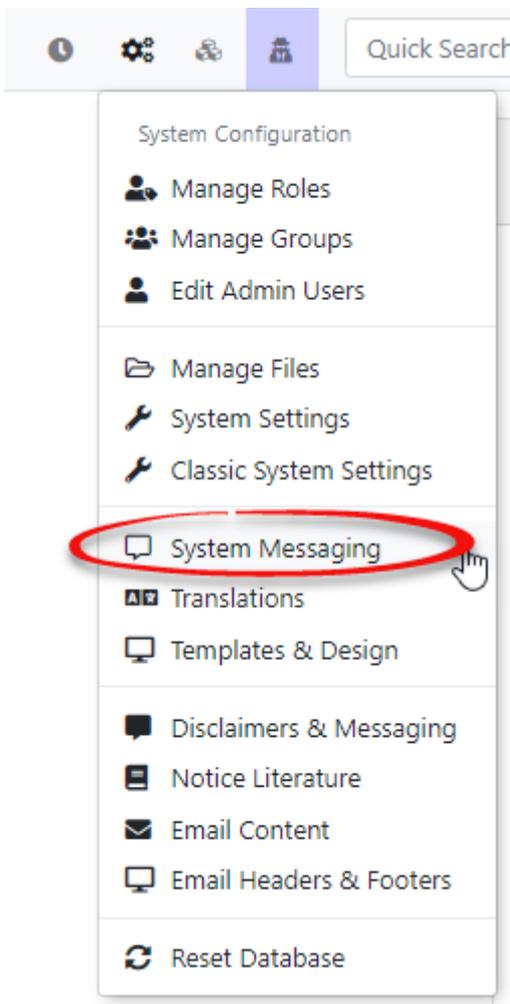

Email and Telephone support.

Status notification within 1 hour during working hours.

24/7 support by email for Critical and Urgent issues only.

For information on submitting critical or urgent issues, please see our [wiki for more information](#).

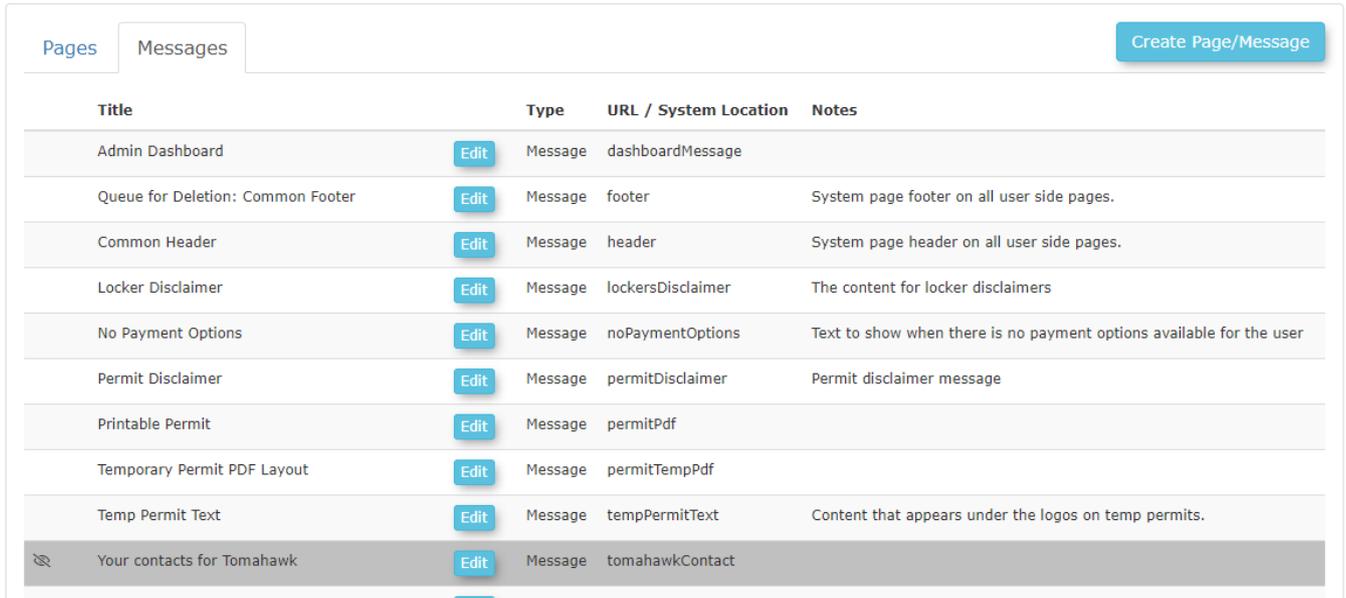

To edit this message, hover over **System Config** and click **System Messaging**.

The **Manage System Messaging** window opens. Click the **Messages** tab.

The items you are allowed to edit are governed by what permission level you have. Some of the items can only be edited by the OPS-COM Support team. In this case, we wish to edit the **Admin Dashboard** message. Click the **Edit** button.

Manage System Messaging

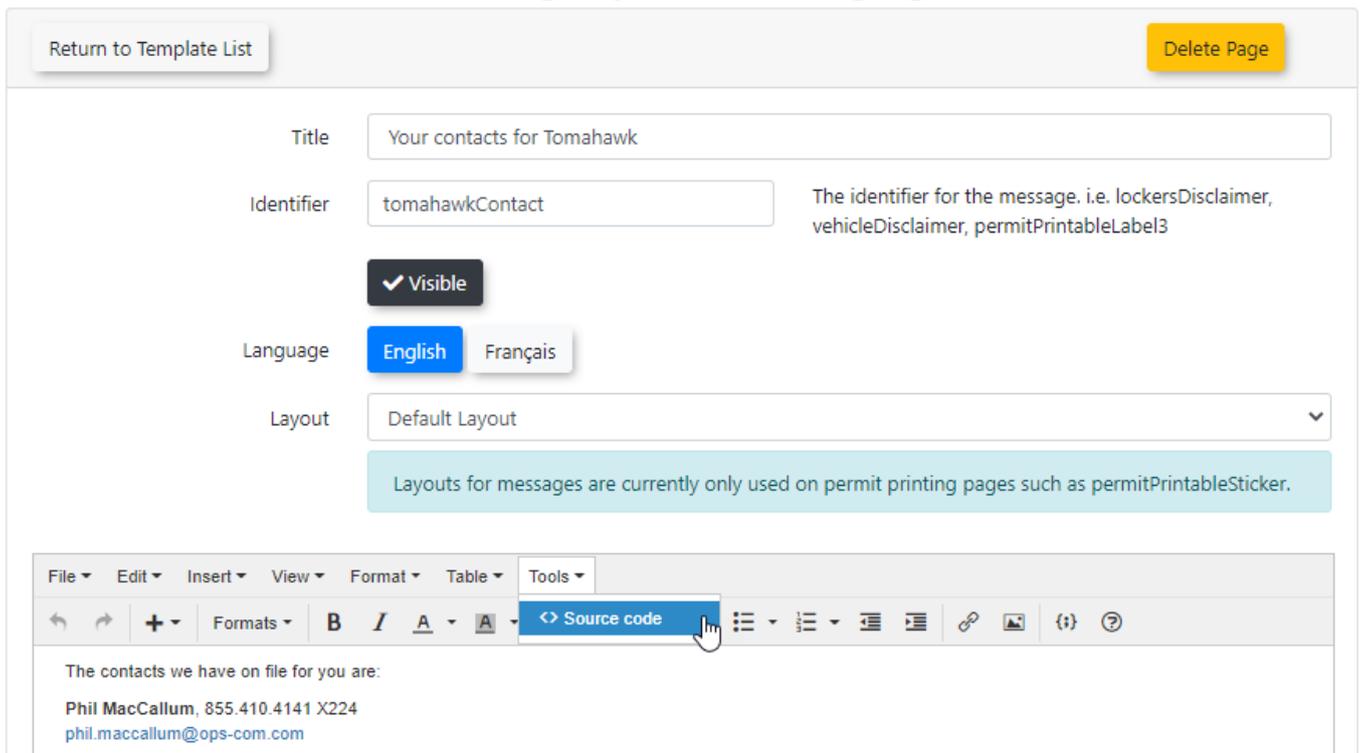

The screenshot shows the 'Manage System Messaging' interface. At the top, there are tabs for 'Pages' and 'Messages', and a 'Create Page/Message' button. Below is a table with columns for Title, Type, URL / System Location, and Notes. Each row has an 'Edit' button. The last row is highlighted in grey.

Title	Type	URL / System Location	Notes
Admin Dashboard	Message	dashboardMessage	
Queue for Deletion: Common Footer	Message	footer	System page footer on all user side pages.
Common Header	Message	header	System page header on all user side pages.
Locker Disclaimer	Message	lockersDisclaimer	The content for locker disclaimers
No Payment Options	Message	noPaymentOptions	Text to show when there is no payment options available for the user
Permit Disclaimer	Message	permitDisclaimer	Permit disclaimer message
Printable Permit	Message	permitPdf	
Temporary Permit PDF Layout	Message	permitTempPdf	
Temp Permit Text	Message	tempPermitText	Content that appears under the logos on temp permits.
Your contacts for Tomahawk	Message	tomahawkContact	

The screen will refresh to display the **Message Editor**. You can edit the text using the WYSIWYG editor by clicking on the content to open the editor. If you prefer to work in HTML, you can select **Source Code** from the **Tools** menu item.

Manage System Messaging

The screenshot shows the 'Message Editor' for the message 'Your contacts for Tomahawk'. It includes fields for Title, Identifier, Language, and Layout. A 'Tools' menu is open, showing the 'Source code' option selected. The editor content shows the text: 'The contacts we have on file for you are: Phil MacCallum, 855.410.4141 X224 phil.maccallum@ops-com.com'.

Title: Your contacts for Tomahawk

Identifier: tomahawkContact
The identifier for the message. i.e. lockersDisclaimer, vehicleDisclaimer, permitPrintableLabel3

Visible:

Language: English (selected), Français

Layout: Default Layout

LAYOUTS FOR MESSAGES ARE CURRENTLY ONLY USED ON PERMIT PRINTING PAGES SUCH AS PERMITPRINTABLESTICKER.

Tools: Source code (selected)

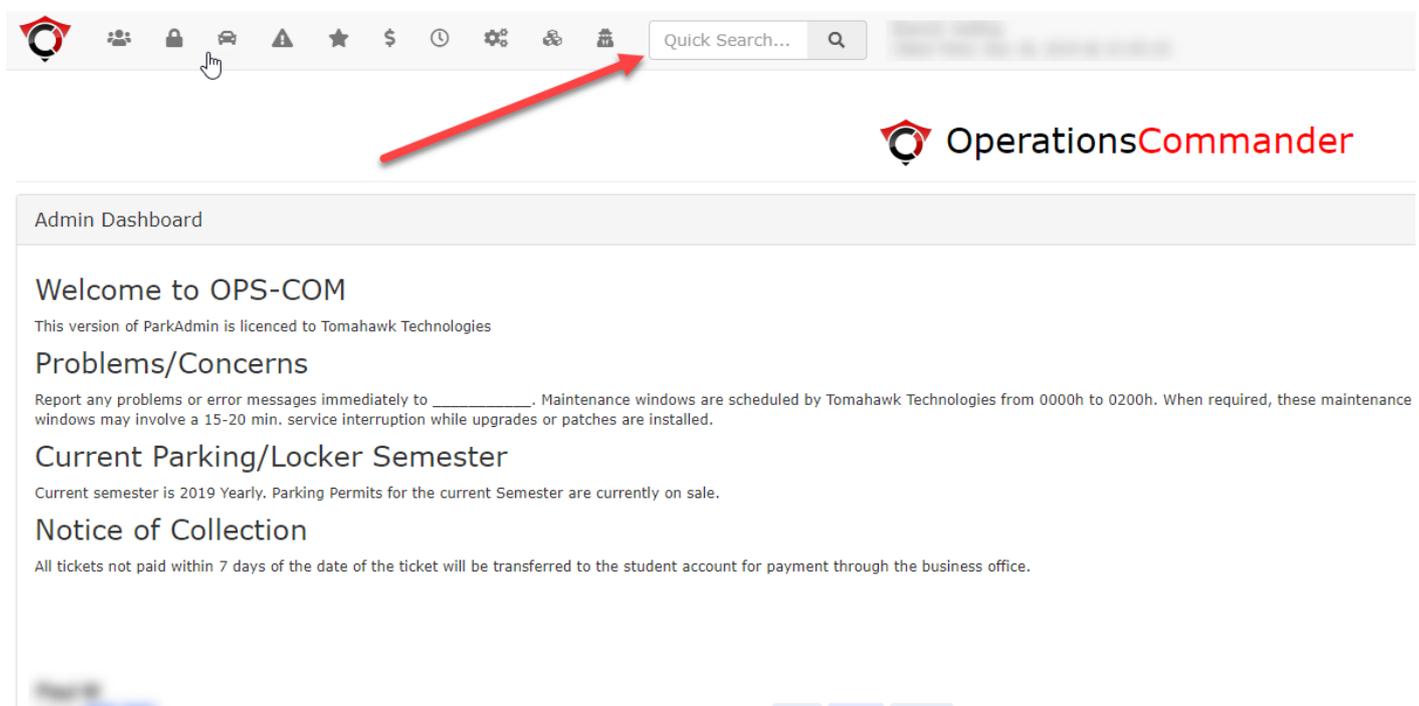

The contacts we have on file for you are:
Phil MacCallum, 855.410.4141 X224
phil.maccallum@ops-com.com

Once you have finished editing the page, click the **Save Messaging** button to confirm the changes. A pop up message will confirm that your changes have been saved.

Quick Search Tool Functionality

Using Quick Search

The **Quick Search** tool requires a minimum of 4 characters to perform a query.

This tool will search the following fields from a single source:

- Searches vehicles by plate
- Searches vehicles by VIN number
- Searches people by:
 - Username
 - Last name
 - Email address
 - Student number
 - Employee number
- Searches violations (in the last 18 months) by:
 - Ticket number
 - Plate of vehicle involved
- Searches incidents (in the last 18 months) by:

- Incident number
- Payments (last 18 months) by:
 - Confirmation code

System Dashboard

Introduction

The system dashboard has been reworked.

Items that appear on the dashboard have been converted into widgets, with it now being possible to create custom dashboard layouts by placing these widgets wherever wanted.

Accessing the Dashboard

The dashboard is the first thing seen on the home page when accessing the admin site.

The screenshot shows the OperationsCommander Admin Dashboard. At the top, there is a navigation bar with the OperationsCommander logo and the user name 'Incident Patrol Officer'. The main content area is divided into several sections:

- Admin Dashboard**: The main header for the dashboard.
- Welcome to OperationsCommander Admin Landing Page**: A greeting message.
- "Important Notices"**: A section for important updates.
- Staff Schedules**: A table showing the schedules for various officers.
- Current Parking Session**: Information about the current parking session.
- Setup Checklist**: A list of items that need review, categorized by importance (important, moderate, minor).
- Premium Support**: Information about support hours and contact details.
- Your contacts for Tomahawk**: A list of contacts for the Tomahawk location.

Officer	Mon	Tue	Wed	Thu	Fri	Sat	Sun
Kevin	7-6	7-6	7-6	7-6	7-6	Off	Off
Mary Beth	12-8	Off	Off	12-8	12-8	9-5	9-5
Don	Off	12-8	12-8	9-6	10-7	Off	Off
Jerome	Off	Off	Off	Off	Off	8-4	8-4

The home page and dashboard can be accessed from anywhere on the site by clicking the OPS-COM logo in the top left of the screen.

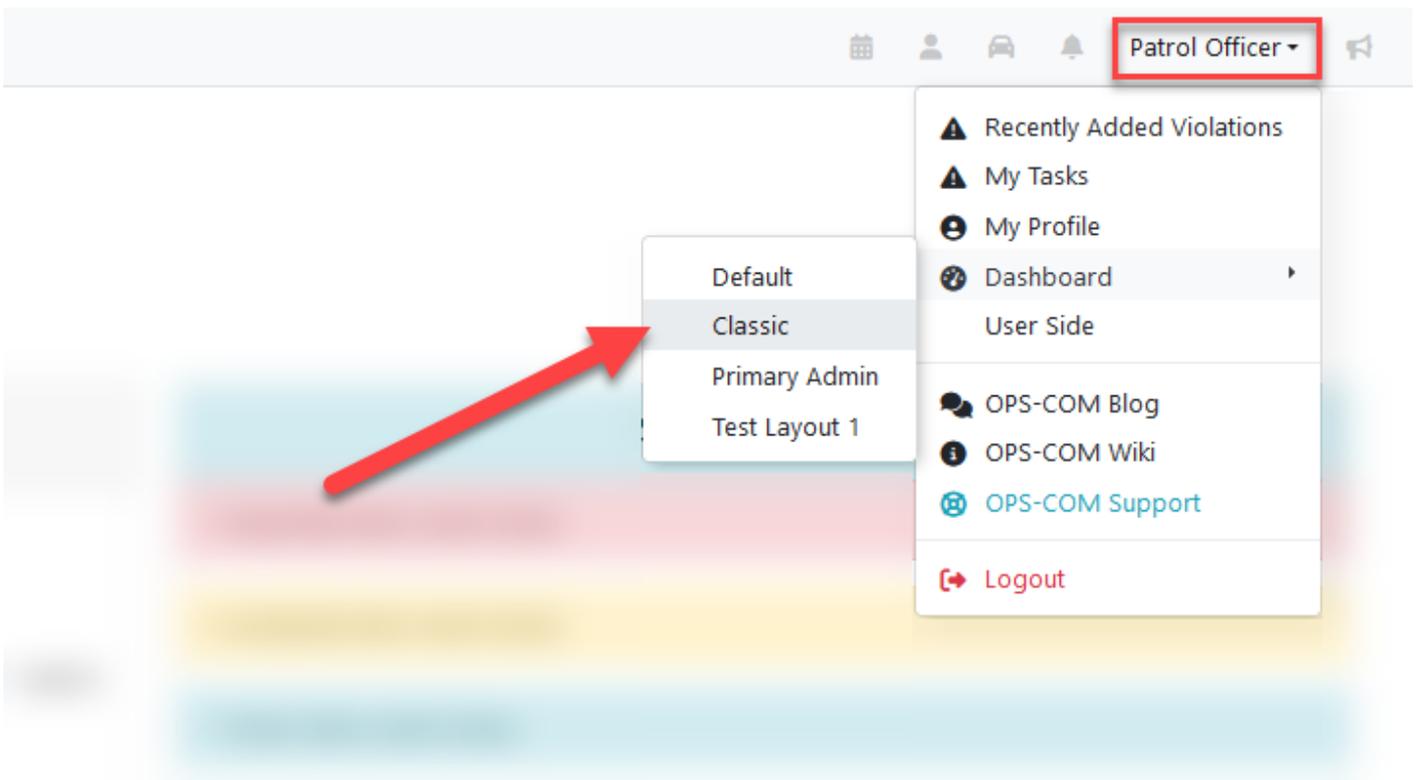

Layouts

Active Layout

For admin users with the correct permissions, a dropdown menu for dashboards will appear below the user menu in the top right of the screen.

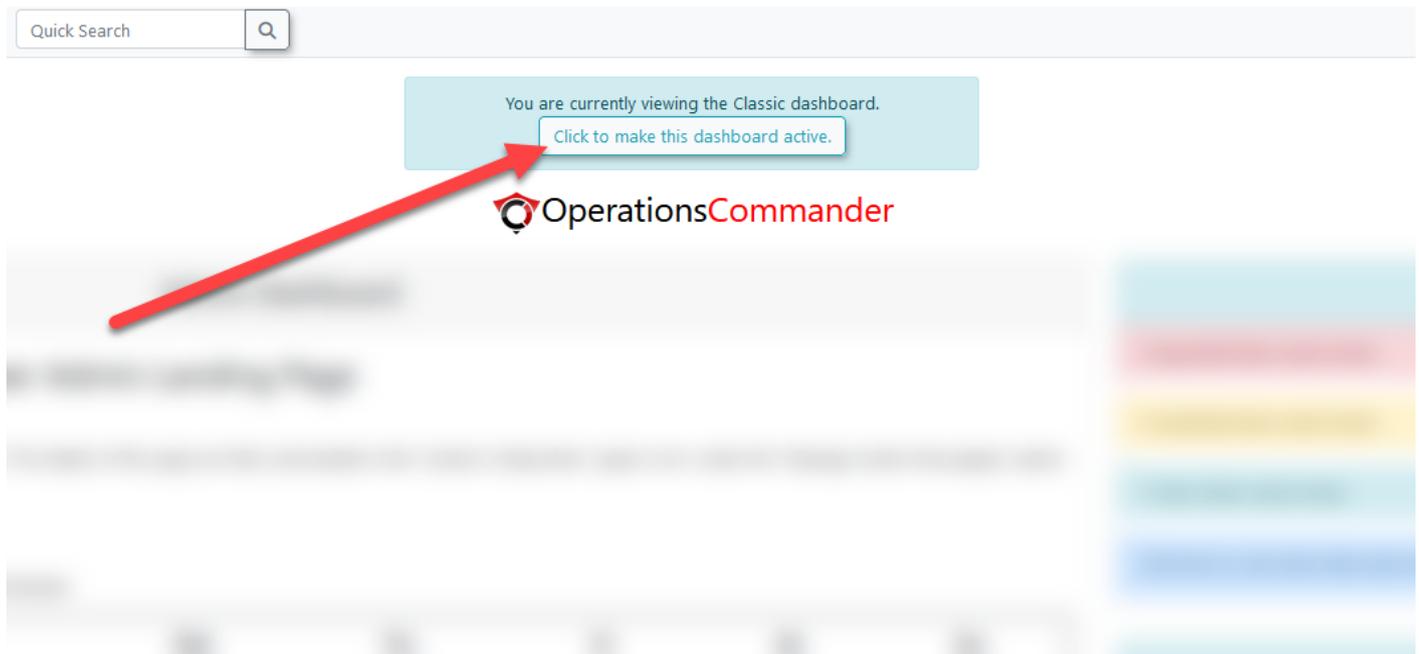

The drop-down menu allows the admin to view the different dashboard layouts that have been created.

Accessing a dashboard will show a preview of the selected dashboard, with the option to make it the user's active dashboard.

The active dashboard is what the admin sees on their home page.

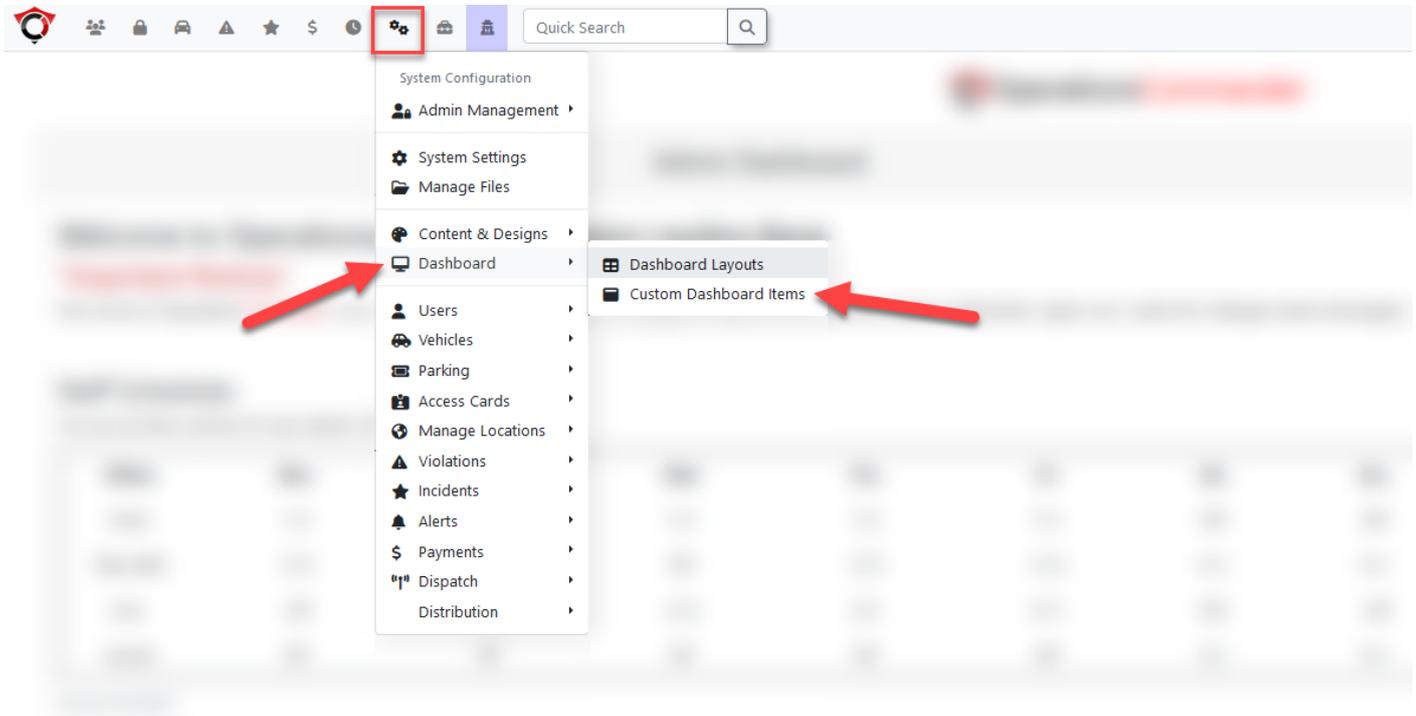

This change only affects the admin that made it.

Dashboard Layout Management

If they have the correct permissions, admins can create and edit their own dashboard layouts by accessing the dashboard layouts and items menu, located under the System Configuration menu.

- Dashboard Layouts - allows the management of dashboard layouts
- Custom Dashboard Items - allows the creation and management of custom widgets

Clicking on Dashboard Layouts will open the dashboard layouts page.

This page contains a list of all existing dashboard layouts, including those created by other admins.

From this page, the user can manage the site's dashboard layouts, including their creation and edit.

Active	Title	Edit
System Default	Classic	Edit
Make System Default	Primary Admin	Edit
Make System Default	Test Layout 1	Edit

This page offers several options to manage dashboard layouts.

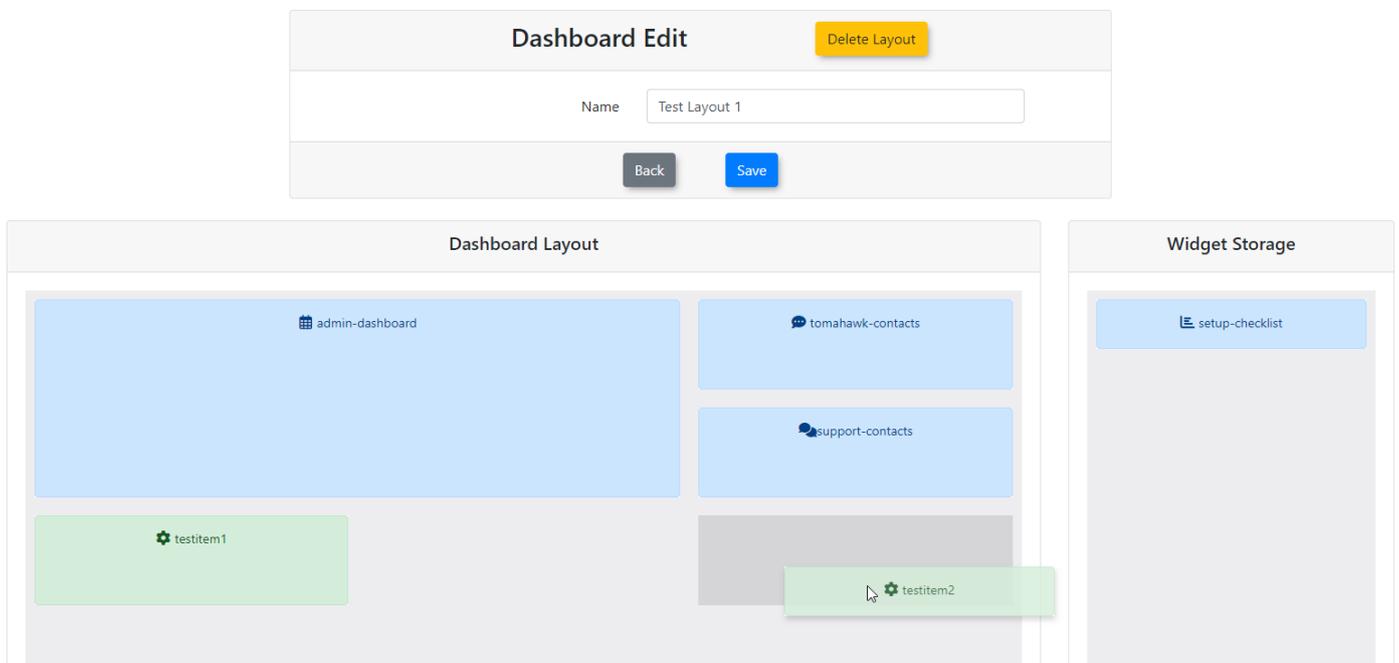

- **New layout** - creates a new dashboard layout.
- **Dashboard Items** - takes the user to the custom dashboard items page. This is also accessible from the System Configuration menu.

- **Make System Default** - sets the system default layout. This is the dashboard that will appear on the home page of users who do not currently have a dashboard set as active. This is separate from the individual user's active dashboard.
- **Edit** - edit the selected dashboard layout.

Creating Dashboard Layouts

Clicking to **Edit** an existing layout or to create a **New Layout** will open the dashboard layout editor.

On this page, admins can drag and drop widgets from the widget storage onto the dashboard layout. The widgets can be moved and resized as desired.

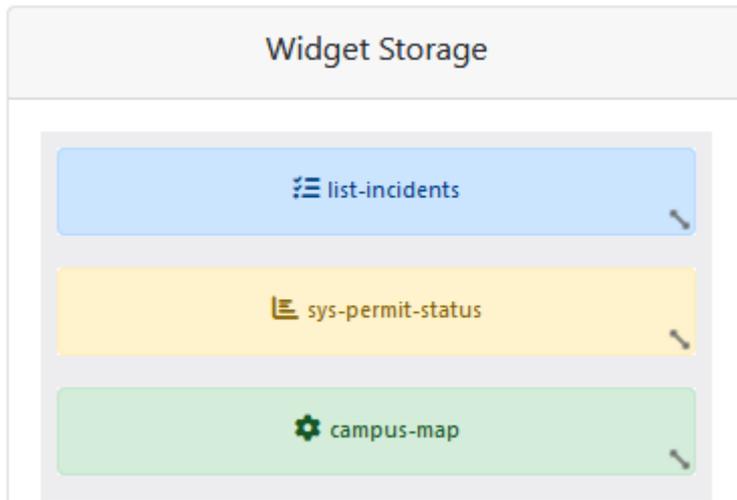

Widgets left in the widget storage will not appear on the dashboard.

Any new widgets, be they system created or admin custom items, will appear here after they are created, where they can then be dragged onto the dashboard.

New system widgets will continue to be added and made available in the widget storage sidebar.

There are several different types of widget, identified by their color.

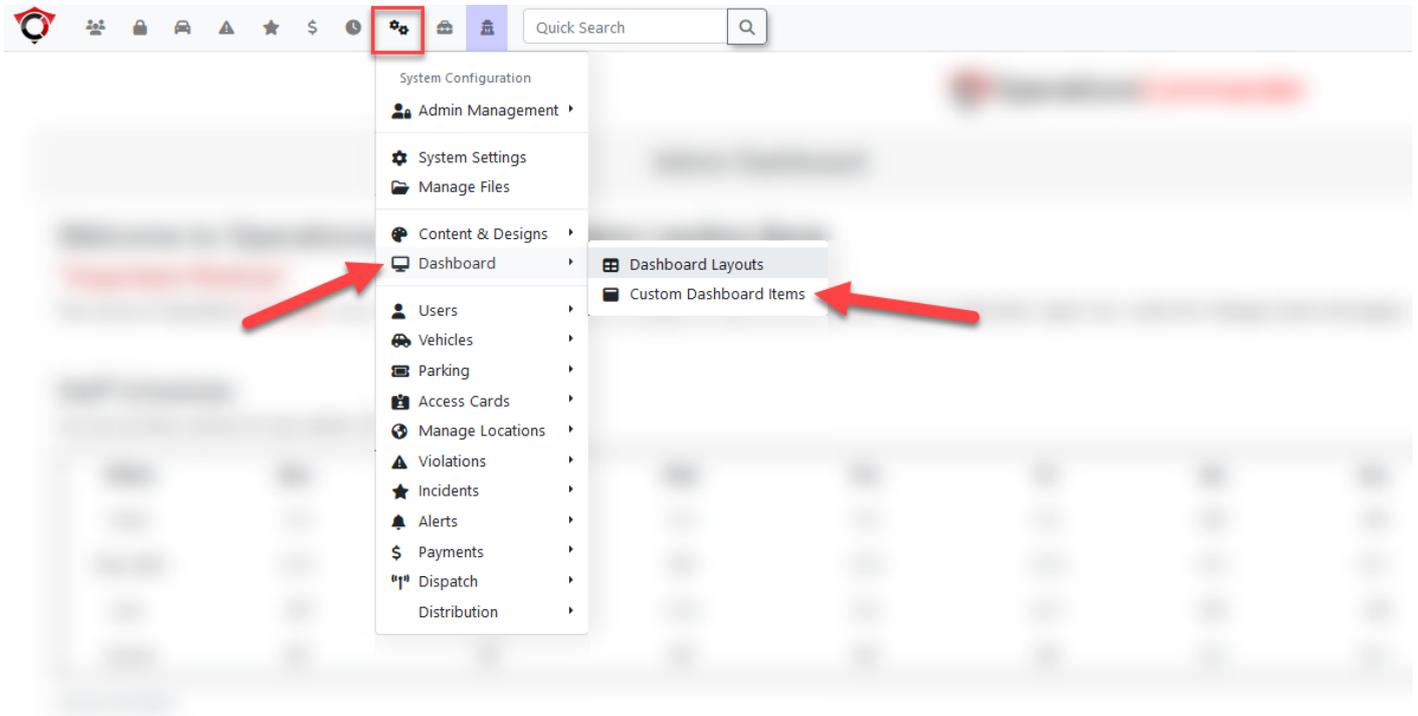

- **Blue** - system widgets. Show important administration information about the site.
- **Yellow** - stats widgets. Display site stats and information in different graph formats.
- **Green** - admin-created custom items. These are the items created on the custom dashboard items page.

Creating Dashboard Items

It is possible for admins to create their own custom dashboard items.

The item management page can be found under System Management, below the Dashboard Management page, or accessed from the management page itself.

When accessed, the page will display a list of the custom dashboard items created by admins.

Custom Dashboard Items				
Name	Identifier	English	Français	Español
Campus Map	campus-map	Edit	Create	Create
Recent Items	recent-items	Edit	Create	Create
New Instructions	new-instructions	Edit	Create	Create

Choosing to **Edit** an existing item or to **Create New** will open the dashboard item editor.

A version of the item can be made for each language installed on the site.

Manage Dashboard Item

[Save Changes](#)

- **Title** - what appears as the widget header on the dashboard.
- **Identifier** - the ID name of the item. This is used to identify it on the dashboard layout editor.
- **Language** - the current language you are creating the item for.
- **Content** - what will appear on the widget. The widget can include objects like text and images.

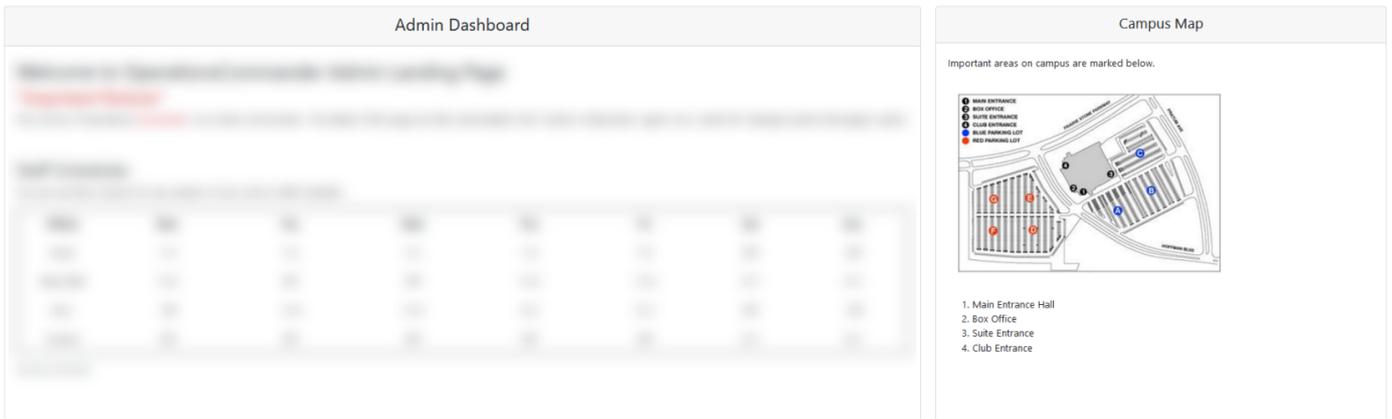

If an item is open to be edited, it can be deleted from this page as well.

Once saved, the custom item will appear in the widget storage sidebar when editing a layout.

It can then be dragged onto the dashboard layout.

After the layout is saved with the custom widget on it, the item will appear when viewing the dashboard.

Permissions

There are several permissions related to managing dashboards layouts.

Permissions for the dashboard can be found under **System Configuration** → **Admin Management** → **Manage Roles** → **Edit a role** → **System Configuration**.

Manage Administrator Roles

Editing Permissions: System Administrator

Permission	Description
✓ Change Dashboards	Can change their default dashboard
✓ Edit Dashboard Items	The ability to edit custom dashboard items.
✓ Edit Dashboard Layouts	The ability to edit dashboard layouts

Save Permissions

- **Change Dashboards** - allows the admin to view other dashboards and change their active dashboard.
- **Edit Dashboard Layouts** - allows the admin to create and manage dashboard layouts.
- **Edit Dashboard Items** - allows the admin to create and manage custom dashboard items.
