# Administrator Groups

1. To manage Administrator Groups, go to **'System Config'** then click on **'Manage Groups'** .

2. You will be directed to a page where you can see your Admin Groups. As you can see, there are no groups on this page. We will be making one for a demo. To make a group, click on **'Add New Group'** Fill out the information, then click **'Save Group'**. You should now see your group that you made on the left hand side.
