

Archiving and Restoring Permits

1. Hover over '**Permit Management**' and click '**Lot Administration**' then '**Allocate**'.

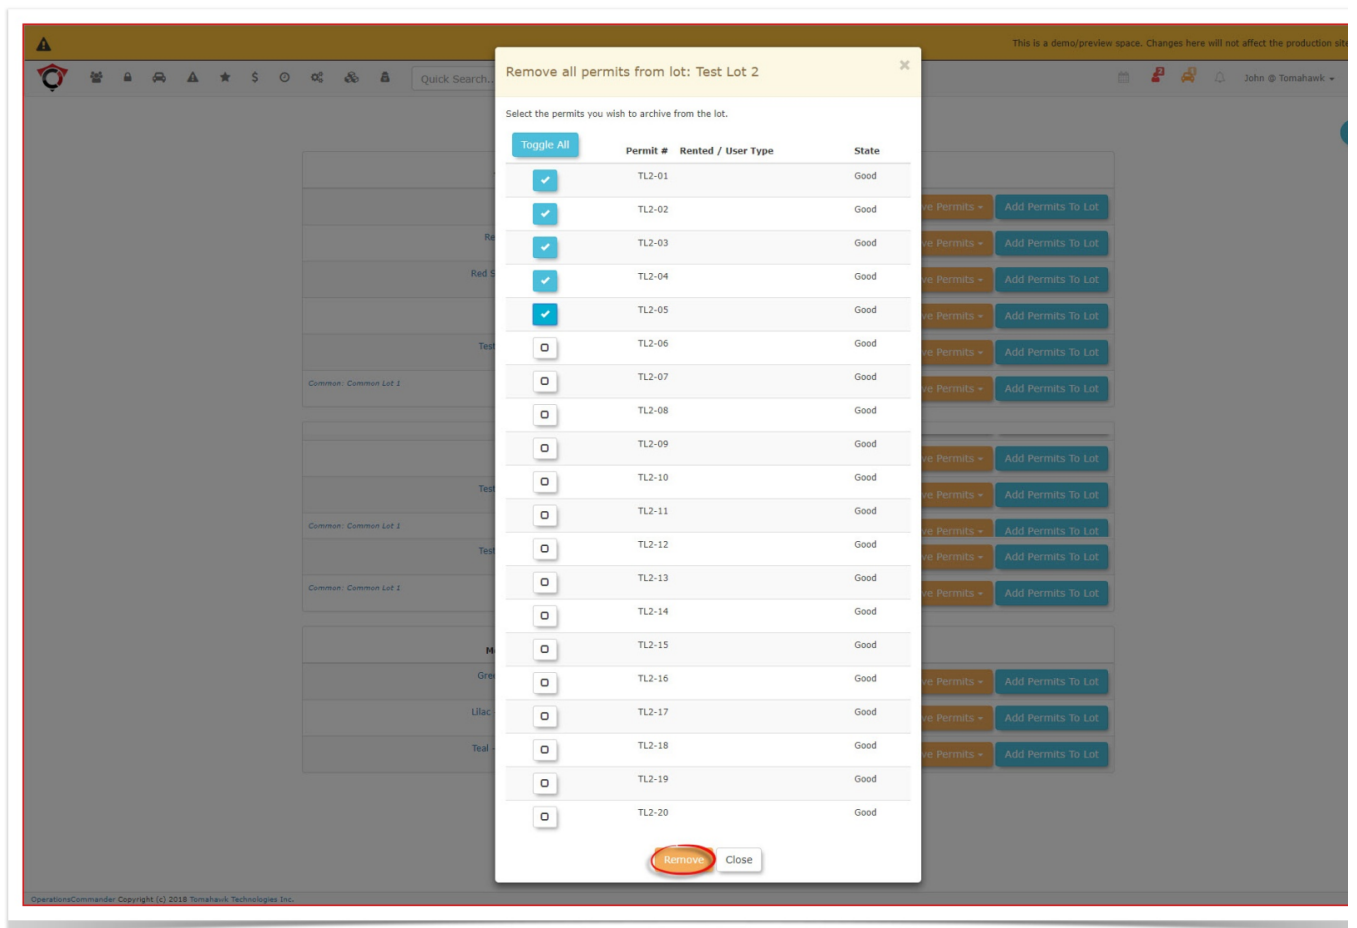

2. We will focus on **Test Lot 2** for this example.

Restoring Permits To A Lot

1. To restore permits in a lot, the admin can simply add the permits back to the lot. To do so, click '**Add Permits To Lot**'.

Test Lot 2	Yes	No	No	15	TL2-11, TL2-18, TL2-20	Archive Permits ▾	Add Permits To Lot
------------	-----	----	----	----	------------------------	-------------------	--------------------

2. In this case there are two ways to add these permits back to the lot. Either method will work.

A) As individual entries:

Add permits to lot: Test Lot 2

Specify the permits you wish to add to the lot.

Permits

*Enter permits one per line.
Any characters are allowed.*

TL2-01
TL2-02
TL2-03
TL2-04
TL2-05

Permit Range

Enter the numerical range to be created for permits. Prefix and postfix are available to add in letters or numbers before or after the permit number.

Prefix

Start

End

Postfix

A confirmation page will be shown before actually creating the permits.

You can use both areas to create permits at the same time.

Optional items When using ranges, postfix and Prefix are not required.

Required items When using ranges, start and end numbers are required and must be integer values.

Permit numbers are only unique to the Lot. They can be reused for other lots. If you are wanting to move permits from one lot to another, you must also archive the permits in the original lot.

Add Permits

Close

- Click '**Add Permits**' to begin the process. A confirmation popup will appear. Notice the confirmation message indicates the permit as "**restored**" as opposed to "**created**", which is the terminology used when adding a new permit.

- A popup message will appear to inform the admin that the process has been completed.

- If you look at the list of permits now, you will notice that permits **TL2-01** through **TL2-05** have been restored.
