

1. The **Plate** field is used to search for a specific plate.

2. The **Valid Date/Time** field is used to search for records since or on the date that is supplied.
3. The **Zones** field is used to search for specific zones that are associated with the lots and machines.
4. The **Sort Order** will sort the individual column data and not shift the rows based on the data provided.
5. The **Validity Filter** will allow you to search between valid, non-valid, or all records.

Vehicles displayed in the results list are able to be edited / viewed by clicking on the plate number.

Revision #3
