

Payment Processing Models

Using a Gateway

This is being phased out as the method for handling payments.

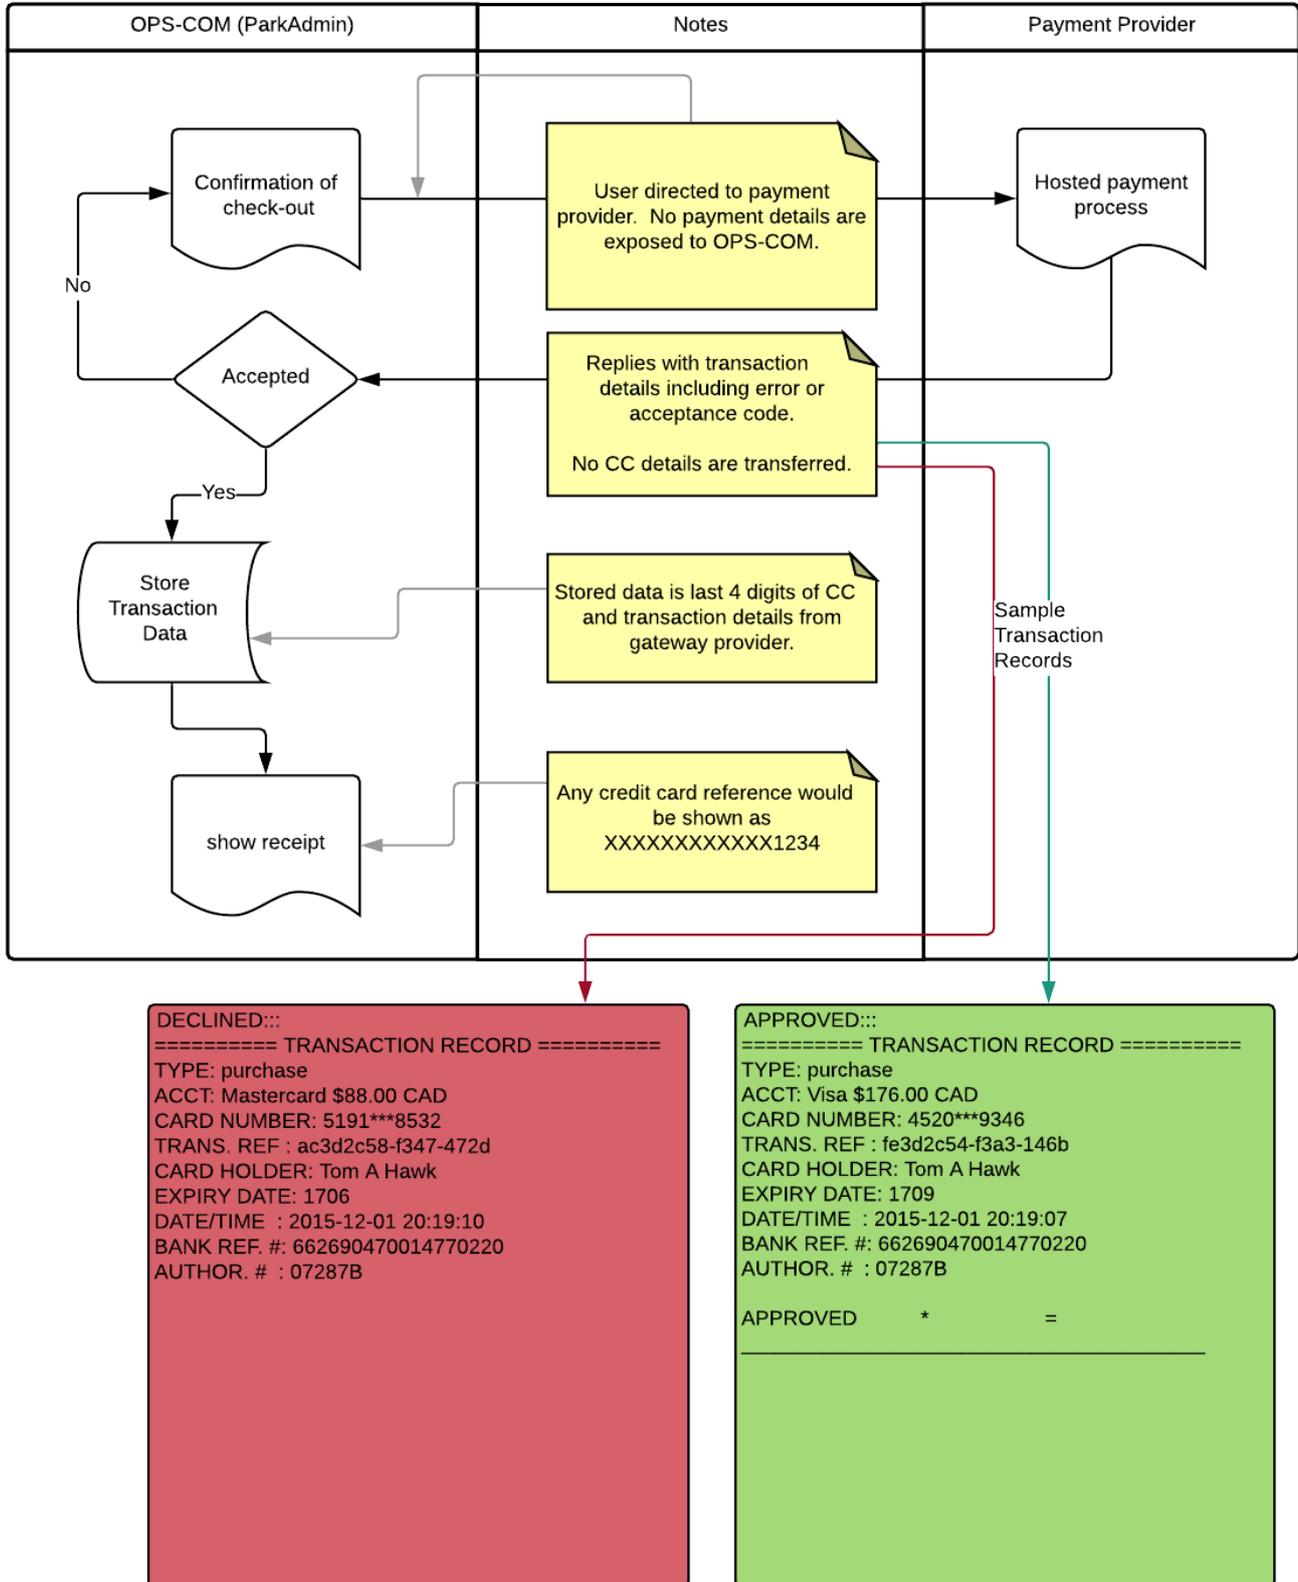

Using Hosted Payments

This is the preferred method for handling payments.

Payment Process - Using Hosted Payments

This diagram describes the hosted payment process. With hosted payments, no card details are supplied on the OPS-COM web site. Users are directed to a the payment provider's hosted payment page where they can supply payment details.

When the transaction is complete, OPS-COM receives only notification that the payment process has been completed.
