

## LPR Scanning Information

### Interpreting LPR flags

Here we have a typical LPR display. Notice the last read plate came from the right side Camera (indicated by the orange arrow beside the plate image)

The screenshot shows the 'PL8-RDR LPR Scanning' interface. At the top, it indicates 'LPR Proxy Connected' and 'STATUS'. Below this, there are dropdown menus for 'Any Parking Group' and 'Any Zone'. A central display shows a license plate image 'BVZT-282' with a timestamp '2019 16:50:17' and the text 'BVZT282-CANON 78.0'. An orange arrow points from the plate image to the right. Below the image, the plate number 'BVZT282' is displayed, followed by a menu icon and a green 'ON' button. A note below the plate number reads 'Chalked: 3 mins ago; no location details'. At the bottom, there is a section for 'RECENT LPR RESULTS' with a count of 30. The results are listed in a table:

Color	Plate ID	Plate Number	Camera	Score
Orange	ARBW512-CANON	ARBW512	TT-mobile	81.0
Orange	AJ59962-CANON	AJ59962	TT-mobile	80.0
Red	BLWW707-CANON	BLWW707	TT-mobile	74.0
Red	BEKY531-CANON	BEKY531	TT-mobile	83.0
Red	BEKS401-CANON	BEKS401	TT-mobile	78.0
Green	BBKP924-CANON	BBKP924	TT-mobile	77.0
Red	AWTP112-CANON	AWTP112	TT-mobile	78.0
Red	AWAJ471-CANON	AWAJ471	TT-mobile	75.0

### Running Scan Total

The running total of how many reads you have done in a session is located on the right, just above the read list. In this case we have 30 reads total.

## Toggle PL8-RDR Scanning

When editing a plate read the system will go into offline mode. This is indicated by the green button shown below changing to red. To continue scanning plates be sure to engage the ON button, make sure it's green before continuing.

## Scan for Plates-of-Interest Only

Alert-only scanning can be done by selecting the toggle at the top of the PL8RDR LPR Scanning panel.

Once selected:

- no permit validation will be performed
- vehicles will continue to be chalked
- alert notifications will be presented if a vehicle of interest is "seen"
