

OperationsCommander - <https://opscom.wiki>

Reinstalling the OPSCOM App

Step one - Uninstalling

To uninstall the OPSCOM app, follow these steps:

From your device homepage, select **Settings**

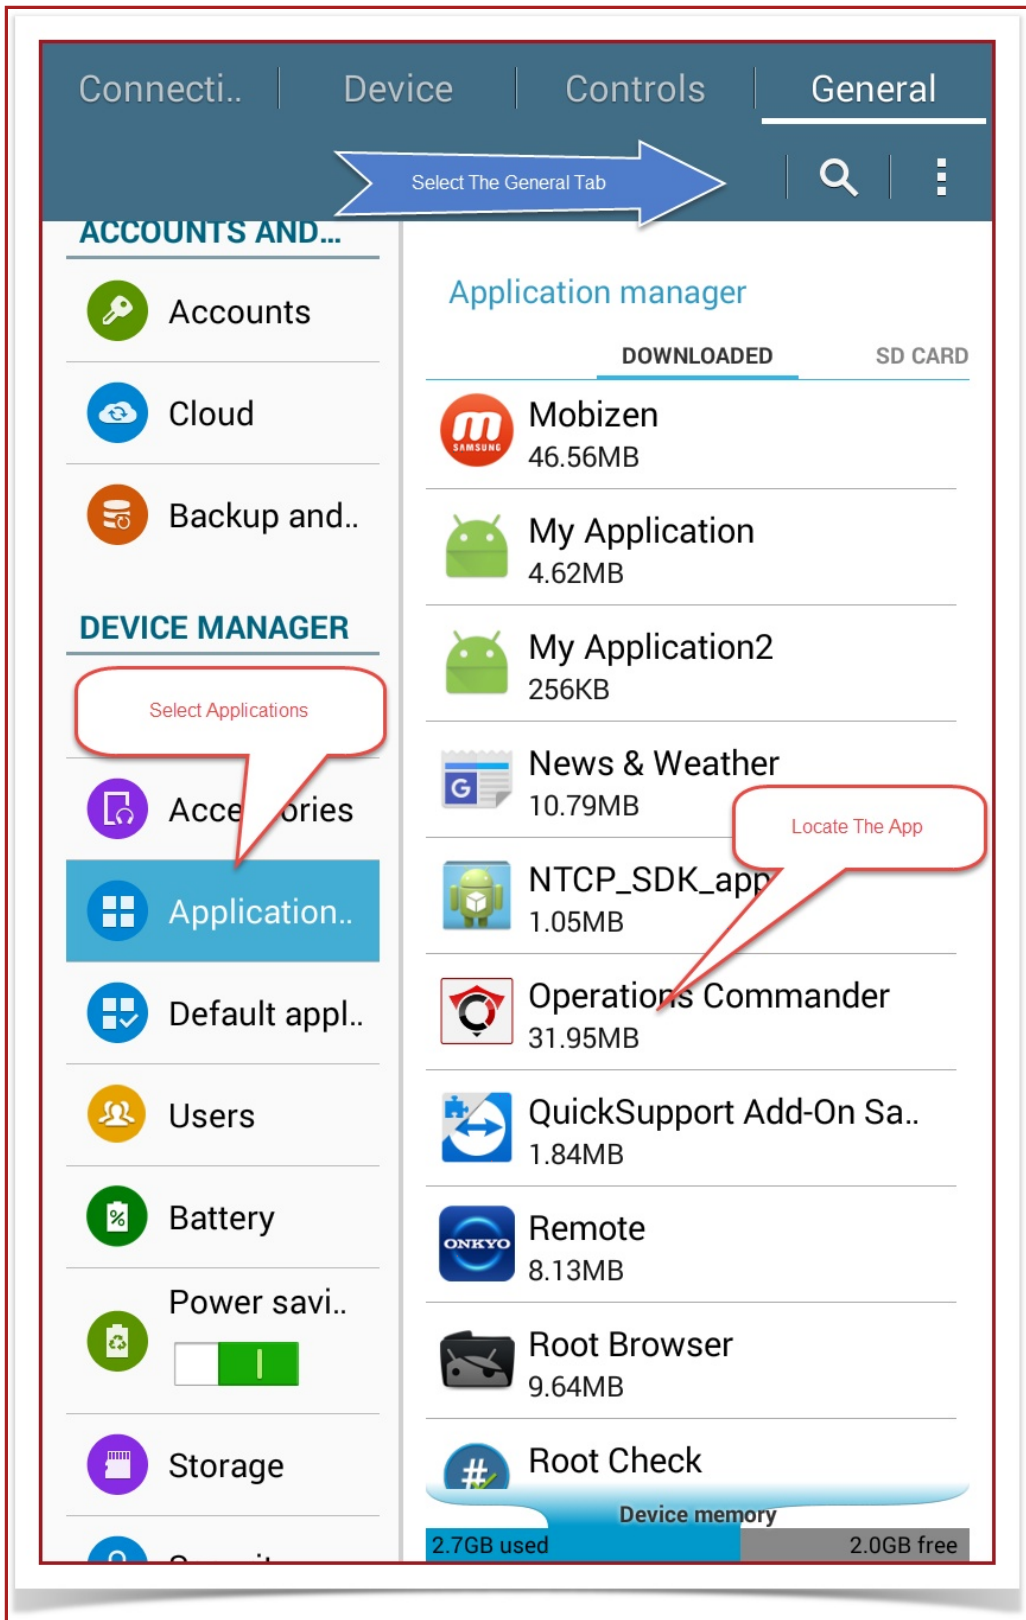

Once in settings:

Select the General Tab.

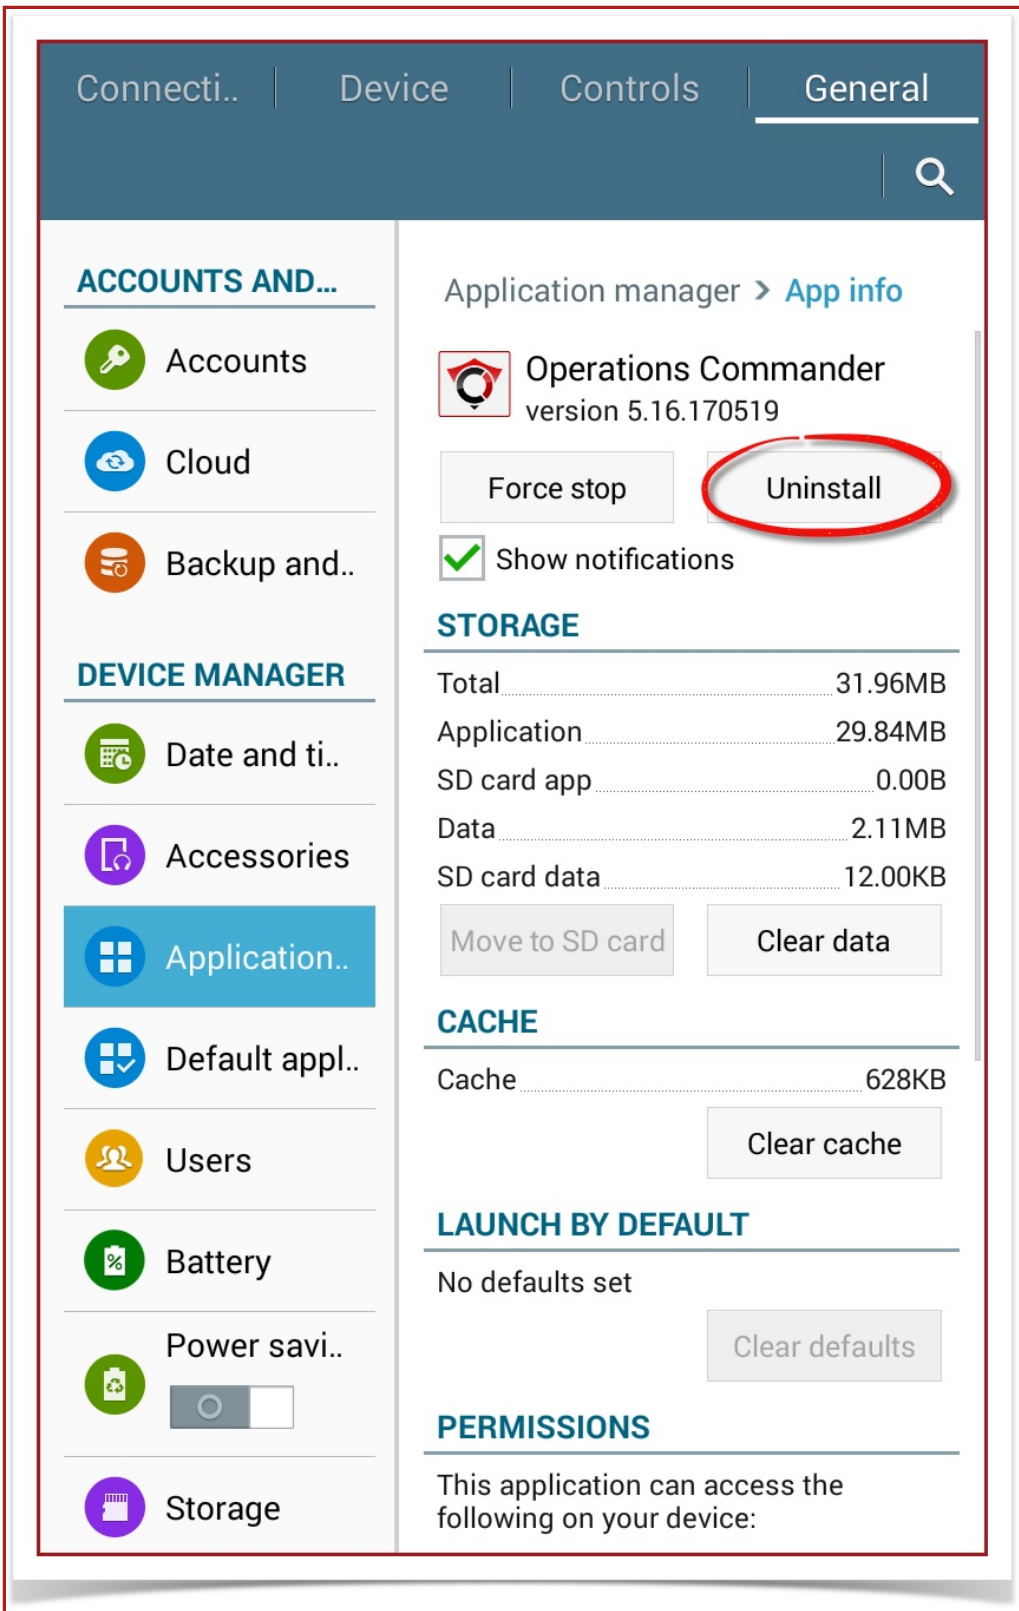

Under Device Manager on the Left of the screen Tap Applications to bring up a list of Apps on the right.

Locate the OPSCOM application in the list.

Tap the application to bring up the following screen:

Tap Uninstall to remove the application from the unit.

Step two - Reinstalling

Please see [Manual Update or Installation](#)
