

The screenshot displays the ANPR MOBILE SYSTEM Advance interface. The top section shows the 'Plate Reader' settings, including 'Plate Locator', 'Char Size Pixel', and 'Plate Format'. The 'System' tab is active, showing 'General' settings like 'Enable Engine', 'Grab Mode', 'Info Position', 'Image Mode', 'White Balance', 'Max Color Gain', and 'Autofocus'. The 'Live Video' feed shows a car with a license plate. Annotations highlight specific features: 'Wireless connection and 3G/LTE (no wired connection)', 'wired connection to camera has been established', and 'whether wired or wireless functionality remains the same'.
