

The screenshot displays the ANPR MOBILE SYSTEM Advance interface. The top bar shows the system name and a warning: "Warning: Engine is stopped if this page is active." The main area is divided into several sections:

- Plate Reader Settings:** Includes tabs for Plate Locator, Char Size Pixel, and Plate Format. The Plate Locator section has fields for Win MinX Pixel, Win MinY Pixel, Win MaxX Pixel, Win MaxY Pixel, and Sensitivity. The Char Size Pixel section has fields for Min Width, Max Width, Min Height, and Max Height. The Plate Format section has fields for Max Jolly Chars, Plate With Separator, Enable UTF8 Encode, and Max Jolly Chars.
- Temporal Integration:** Includes fields for Max Time Transit ms, Min Time Same Plate ms, Max Plates in Image, Image Selection Mode, Enable Multi Out Same Plate, Min Num Plate Read, Apply Min Num Read, and Min Plate Score for Num Read.
- Advanced Features:** Includes a section for Advanced Settings.
- General:** Includes fields for Enable Engine, Info Position, Image Mode, White Balance, Max Color Gain, and Autoiris.
- System:** Includes fields for Info Level, Info Speed, Min Gain, Max Gain, Min Shutter, and Max Shutter.

Annotations highlight specific features:

- "Wireless connection and 3G/LTE (no wired connection)" points to the "Wireless connection" option in the "General" tab.
- "wired connection to camera has been established" points to the "wired connection" option in the "General" tab.
- "whether wired or wireless functionality remains the same" points to the "wired connection" option in the "General" tab.
