Migrate from Legacy Handheld to Enforce Handheld App

> Before you say goodbye to the old app on any device, make sure to complete a full sync so all your tickets are safely pushed up to the Admin portal.

1. **DOWNLOAD THE APP**
   - Tap the Play Store app on the device's main screen to open it.
   - Tap the search bar and type **OPSCOM Enforce** or **OPSCOM**.
   - Tap the **OPSCOM Enforce** application icon from the search results to access the store page.
   - Tap the Install button to begin the download process.
   - Tap Accept on the settings pop-up window to grant the application access to required device integrations.
   - Tap the Open button directly within the store once the installation completes, or return to the device's home screen and tap the newly created OPSCOM app shortcut.

1. **REGISTER THE APP (ADMIN)**
    - Login to the OPSCOM Admin Portal.
    - Under Violations, select Handheld Devices.

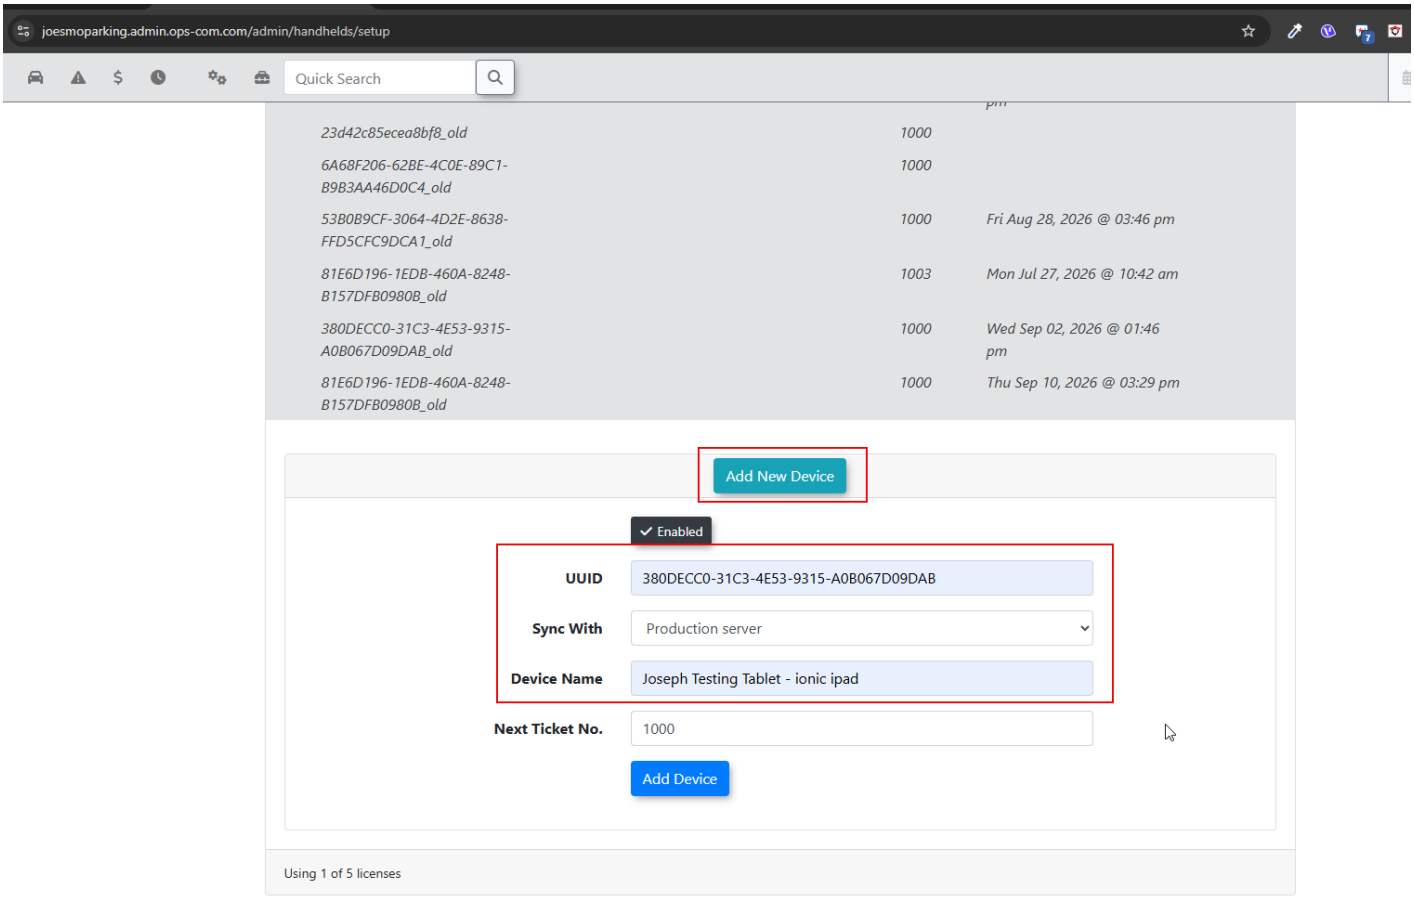

- Click on the **Add New Device**

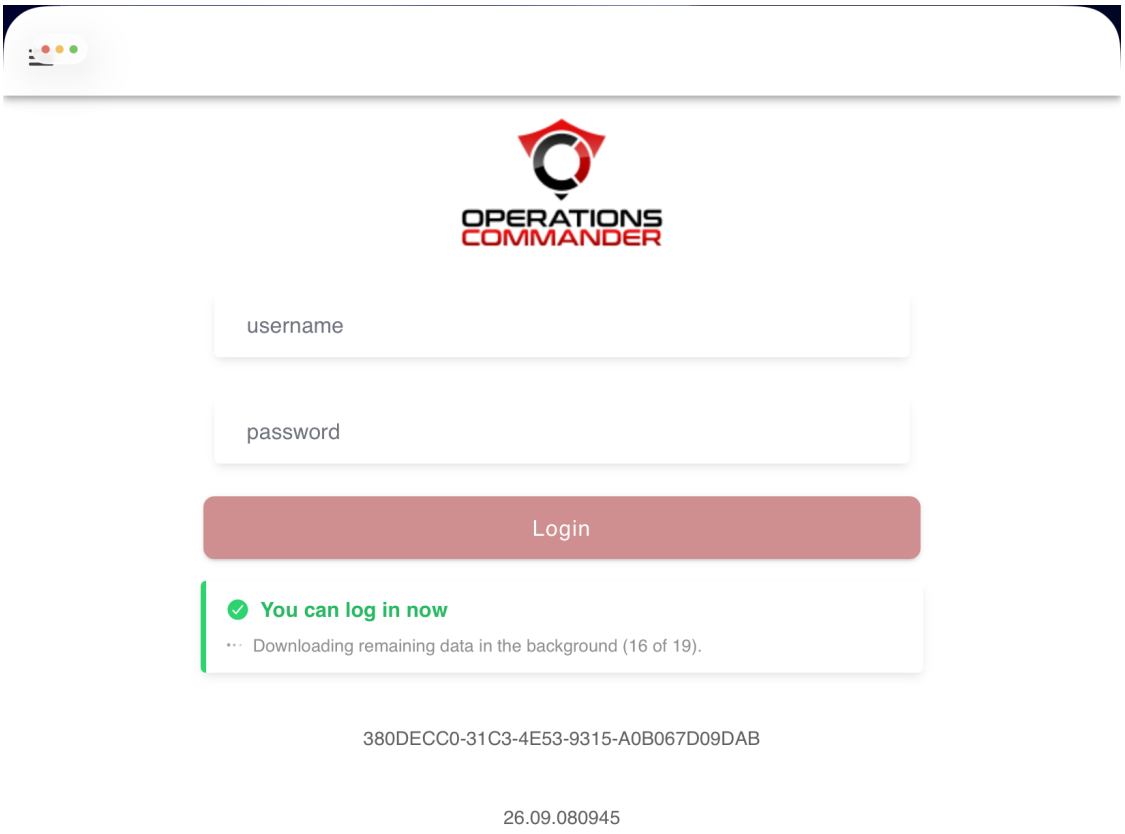

- Fill in the UUID from the running Enforce App(see screenshot below) -> select **Production Server** for Sync With -> Give your device a name and leave the rest of the settings.

- Click on Add Device to register the device.

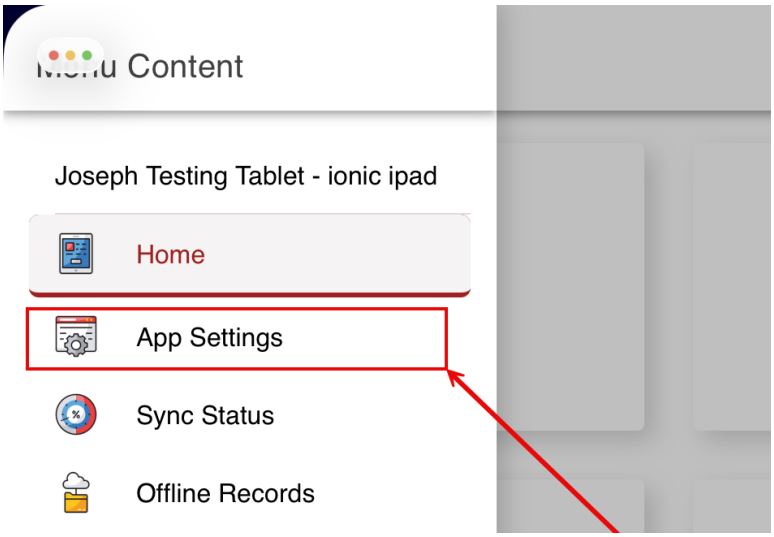

1. **COMPLETE THE APP CONFIGURATIONS (Back in the running Enforce app)**
   - Click on Refresh button to sync and complete the configuration.
   - Accept the permissions and login.

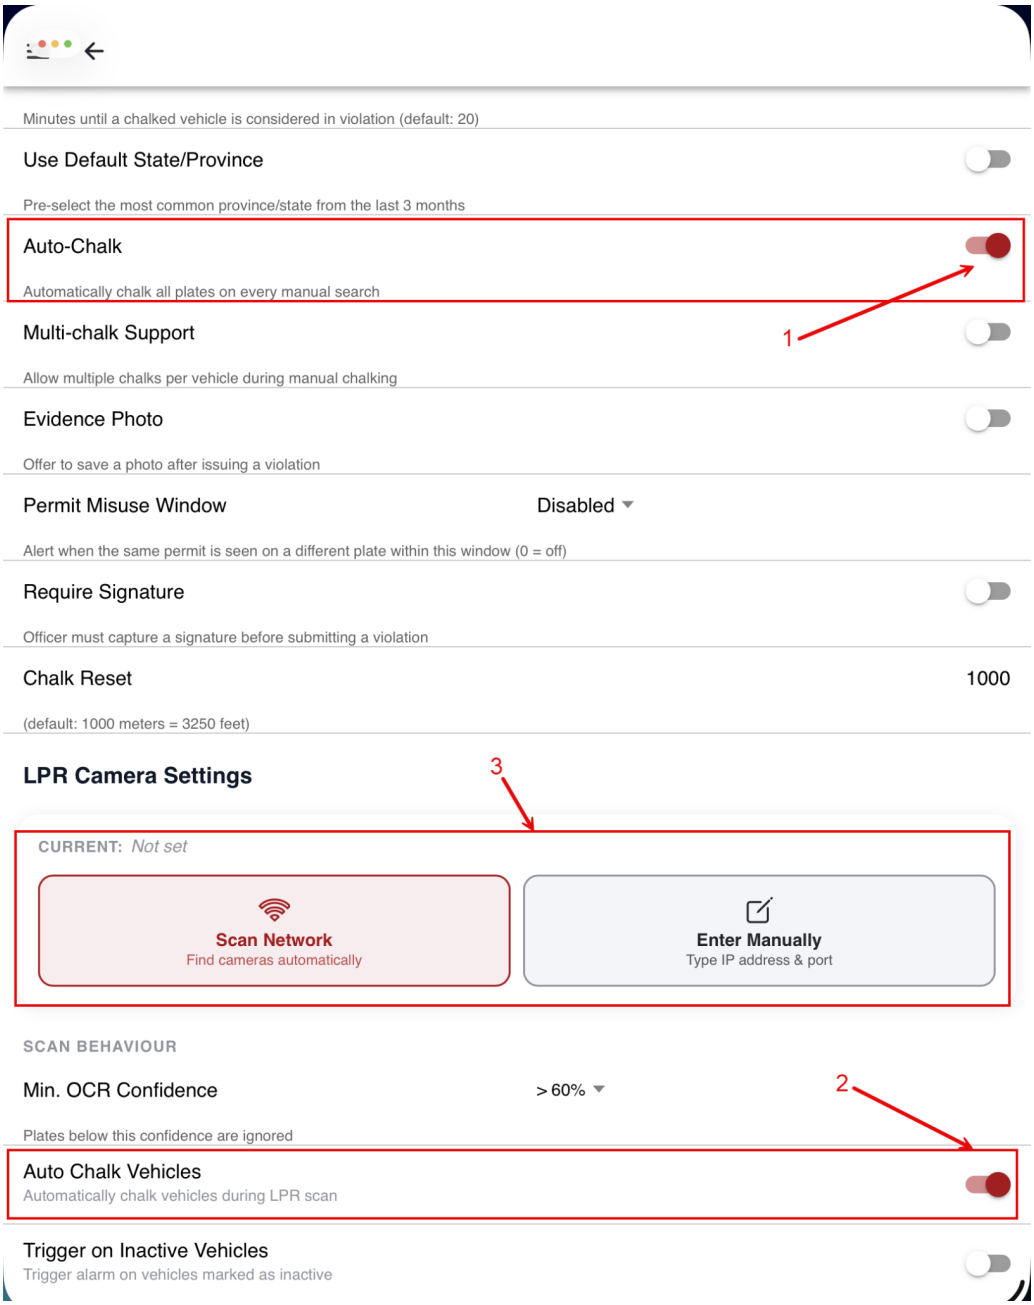

HANDHELD CHALKING AND LPR CONFIGURATION

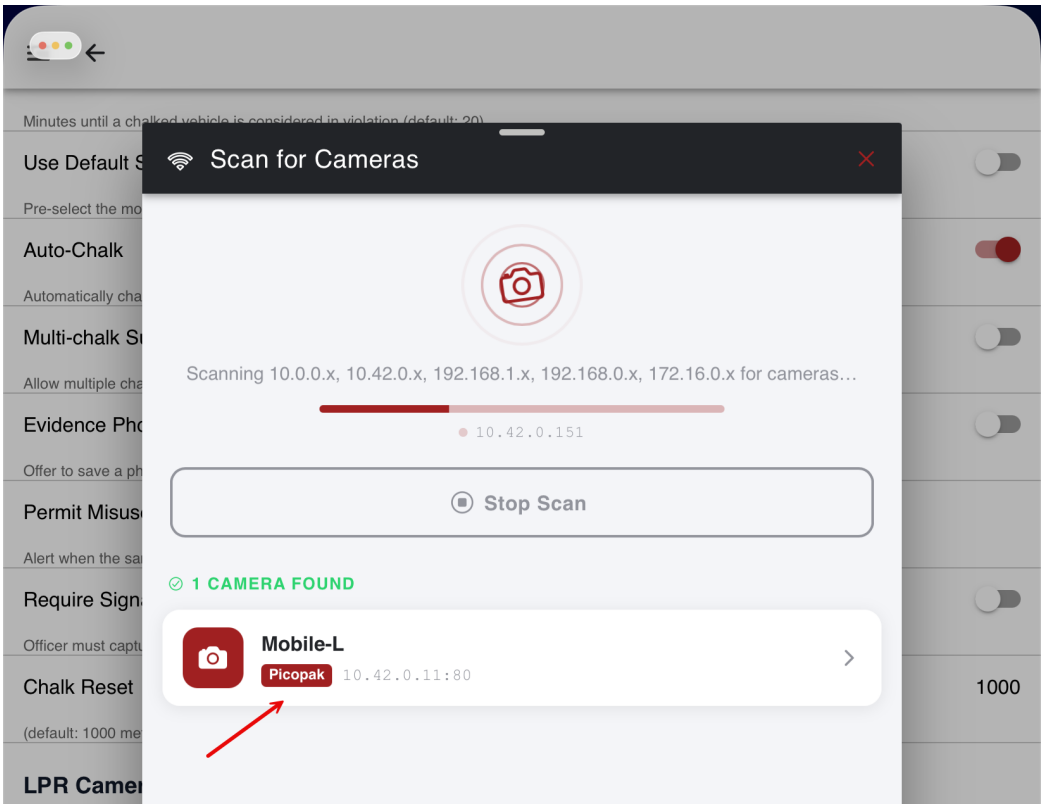

Click on the hamburger menu ≡ at the top left corner and select App Settings.

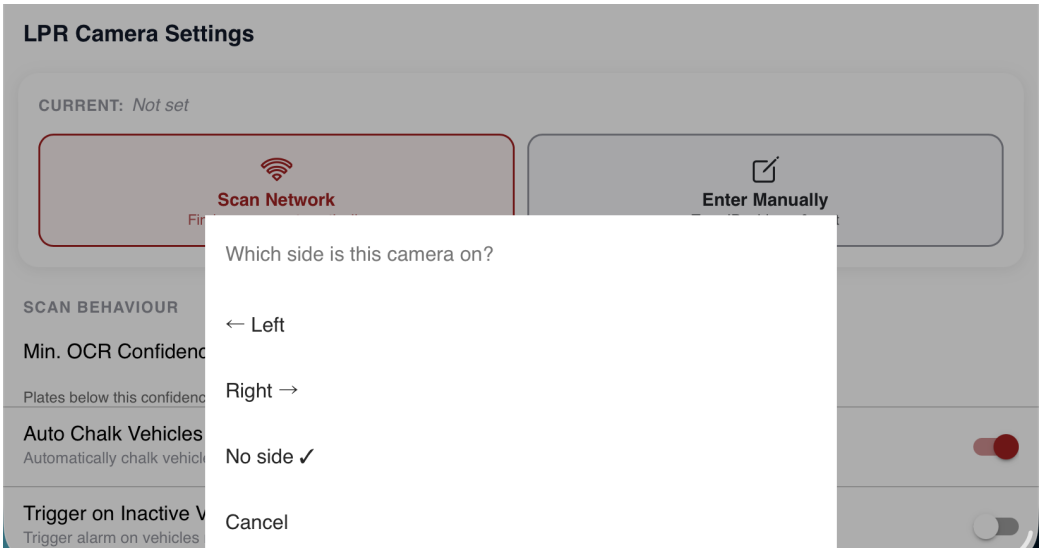

1. Enable Auto-Chalk
   - Under Violations and Chalking, check the Auto-Chalk Vehicles.
2. Add the LPR cameras

- Under the LPR Camera Settings, add the IP addresses of the cameras.
- Use Scan Network or Enter Manually to add the IP address of the cameras (Eg. 10.42.0.11, 10.42.0.12, etc.).
- Select the direction of the camera (Left or Right).

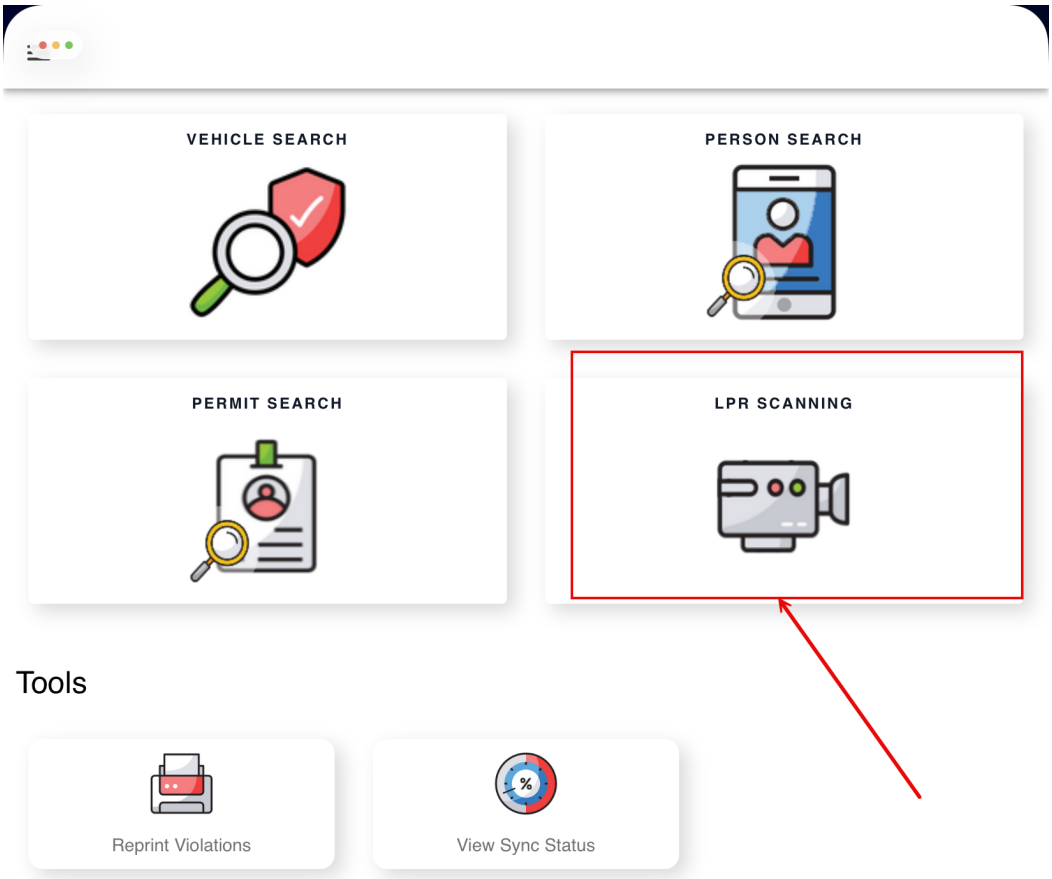

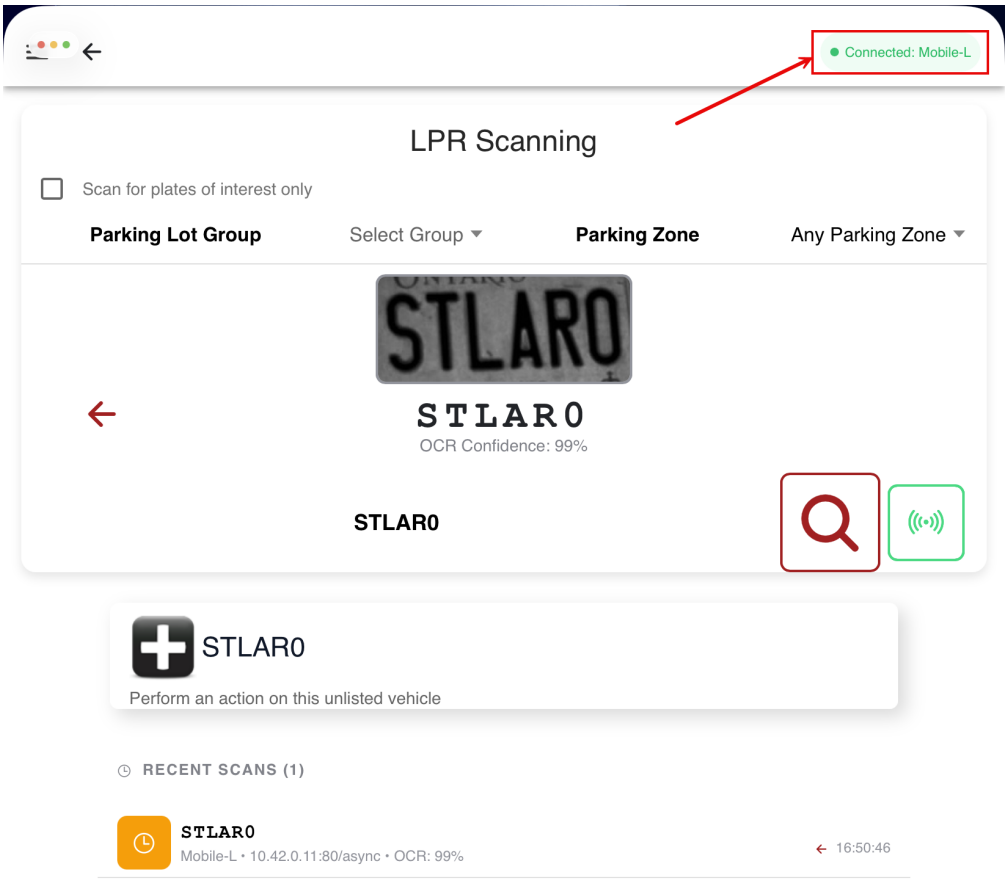

TEST THE LPR SCANNING

- Select the LPR SCANNING from the home icons.

- Confirm the connection status and start scanning some plates.
