

Set Up Your Device for OPS-COM

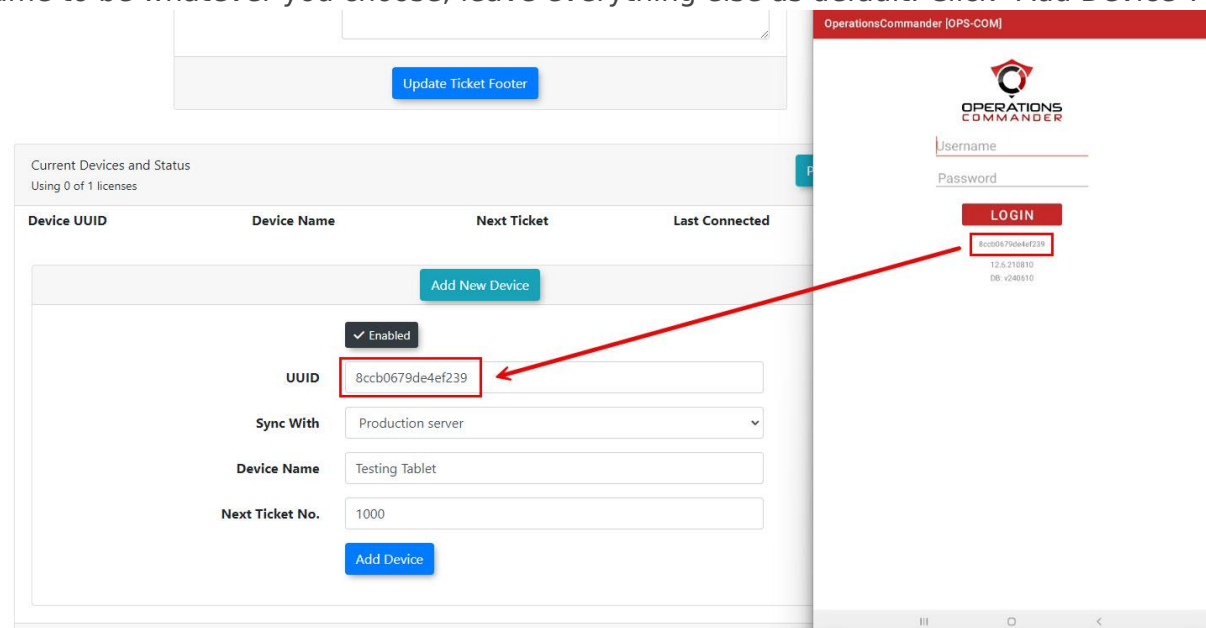

1. Install "OPS-COM Parking Enforcement" from the Google Play Store.

2. On a computer, log in to your OPS-COM admin website. Navigate to *Violations* → *Handheld Devices*.

- Click "Add New Device". Open the app to find the UUID on the login screen; set Device Name to be whatever you choose; leave everything else as default. Click "Add Device".

- Finally, you'll need to **uninstall and reinstall** "OPS-COM Parking Enforcement". After that, you are good to go! Log in to the app using the same credentials you use for the admin website to start enforcing.
- Need help with anything? Send an email to **support@ops-com.com** and our team will be happy to assist you.
