Branding the Validator Tool

Accessing the Validator Pages to Edit the Look and Feel

From the **System Config** Menu click on **System Messaging**.

A page with two tabs will appear. Click on the **Messages** tab to access the list of editable messages.

Manage System Messaging

[Create Page/Message](#)

PagesMessages

URL	Title	English	Français	Notes
--lots-detail	Lots Detail	Edit	Create	
/	User Dashboard	Edit	Create	The main page after a user logs in
lockers	Lockers	Edit	Create	
login	Login	Edit	Create	User page for logging in.
lots	lots	Edit	Create	
permits	Permits	Edit	Create	
register	User Registration	Edit	Create	
vehicles	My Vehicles	Edit	Create	
violations/appeals	Appeals Message	Edit	Create	

There are three messages to edit for the Validator Tool.

They are:

The Validator Entry message

The Validator Manage message

The Validator Report message

Each of these pages represent the three Validator Tool Pages.

The screenshot shows a web application interface with a navigation menu on the left. The menu items are:

- Parking Management
- Permit Search
- Permit Switch
- Move User's Permit and History
- Awaiting Payment
- Waiting Lists
- Reports
- Temporary Permits
- License Plate Recognition
- Hang Tag Printing
- Access Cards
- Lot Administration
- Sales Window
- Parking Validation** (selected)

The 'Parking Validation' sub-menu is open, showing the following options:

- Create Validations
- Manage Validations
- Parking Validation Report

In the background, a table is visible with the following data:

		Wed	
		7-6	

Below the table, there is a table with two rows and two columns:

Off	12-8
Off	Off

Here's what they look like in the **Message System Editor**.

Manage System Messaging

[Create Page/Message](#)

Pages Messages

System Location	Title	English	Français	Notes
admin.validator.entry	Validator Entry	Edit	Create	
admin.validator.manage	Validator Manage	Edit	Create	
admin.validator.report	Validator Report	Edit	Create	
appealDisclaimer	Appeal Disclaimer	Edit	Create	
dashboardMessage	Admin Dashboard	Edit	Create	
footer	Queue for Deletion: Common Footer	Edit	Create	System page footer on all user side pages.
header	Queue for Deletion: Common Header	Edit	Create	System page header on all user side pages.
lockersDisclaimer	Locker Disclaimer	Edit	Create	The content for locker disclaimers

To edit the message click on the **Edit** button

Manage System Messaging

[Create Page/Message](#)

Pages Messages

System Location	Title	English	Français	Notes
admin.validator.entry	Validator Entry	Edit	Create	
admin.validator.manage	Validator Manage	Edit	Create	
admin.validator.report	Validator Report	Edit	Create	
appealDisclaimer	Appeal Disclaimer	Edit	Create	
dashboardMessage	Admin Dashboard	Edit	Create	
footer	Queue for Deletion: Common Footer	Edit	Create	System page footer on all user side pages.

The edit page will display.

On this screen you will enter a title for your page as well as an identifier. This identifier must be unique.

You may also select a language setting for your page.

The page can be edited in the WYSIWYG editor where you can visually design the page.

NOTE: The main graphic image used in our example measures **1448 pixels in width and 227 pixels in height.**

Best practice would be to **maintain the same width** but the **height can be your preference.** Upload the preferred image to your **Files Folder** using the **Manage Files** functionality.

Shortcodes `[system_code]`

The system_code shortcode is replaced with elements that are used by OPS-COM. They can be things like login forms and notification containers. They allow you to place these elements anywhere on your page that you see fit. If the page is a system page like /login, and it doesn't have the shortcode anywhere, it will append it to the bottom of the content page.

[Save Messaging](#)

It is also possible to edit the page in straight **HTML**. To do so go to the **Tools** menu and click on **<>Source Code**.
