

Chase E-xact Hosted Payments

Unlike the Direct Post Method, E-xact uses Hosted Payment Page (HPP) integration with Relay Response. The customer is redirected to E-xact's secure payment form, and transaction results are posted back to our webhook endpoint.

Setting up Chase E-xact Payments

In order to configure the client OPSCOM site to use Chase E-xact Hosted Payments the client must supply the following credentials:

- Company Name
- Their exacted
- The password used to access the account
