Search Repeat Offenders Report

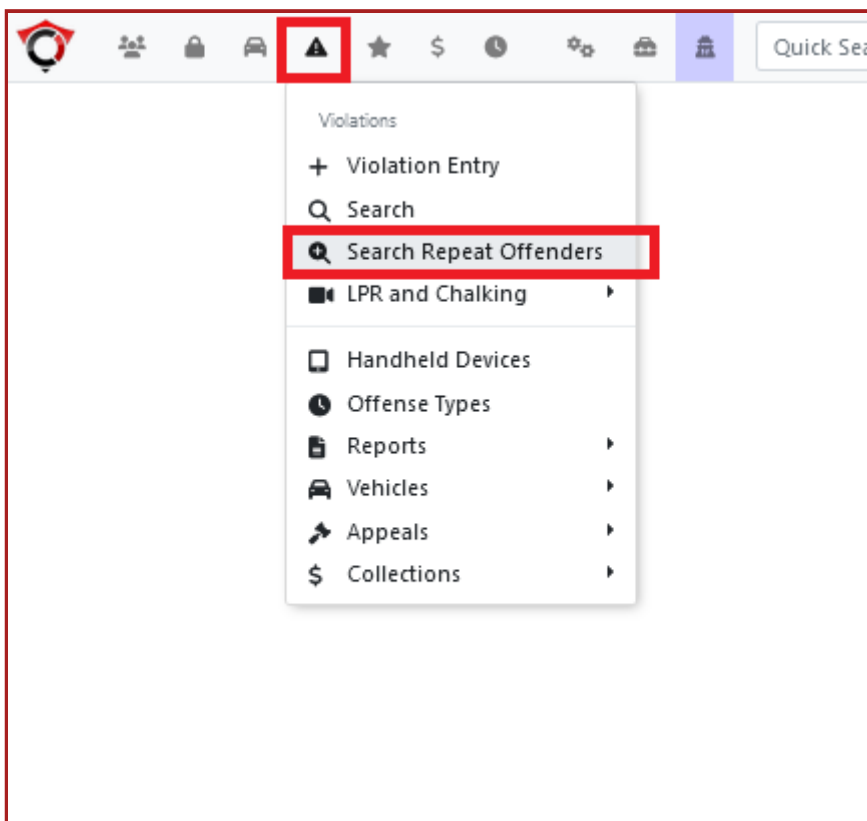

Introduction

The search repeat offenders page allows site admins to find vehicles and users on the site that have received multiple parking violations on their account.

Navigation

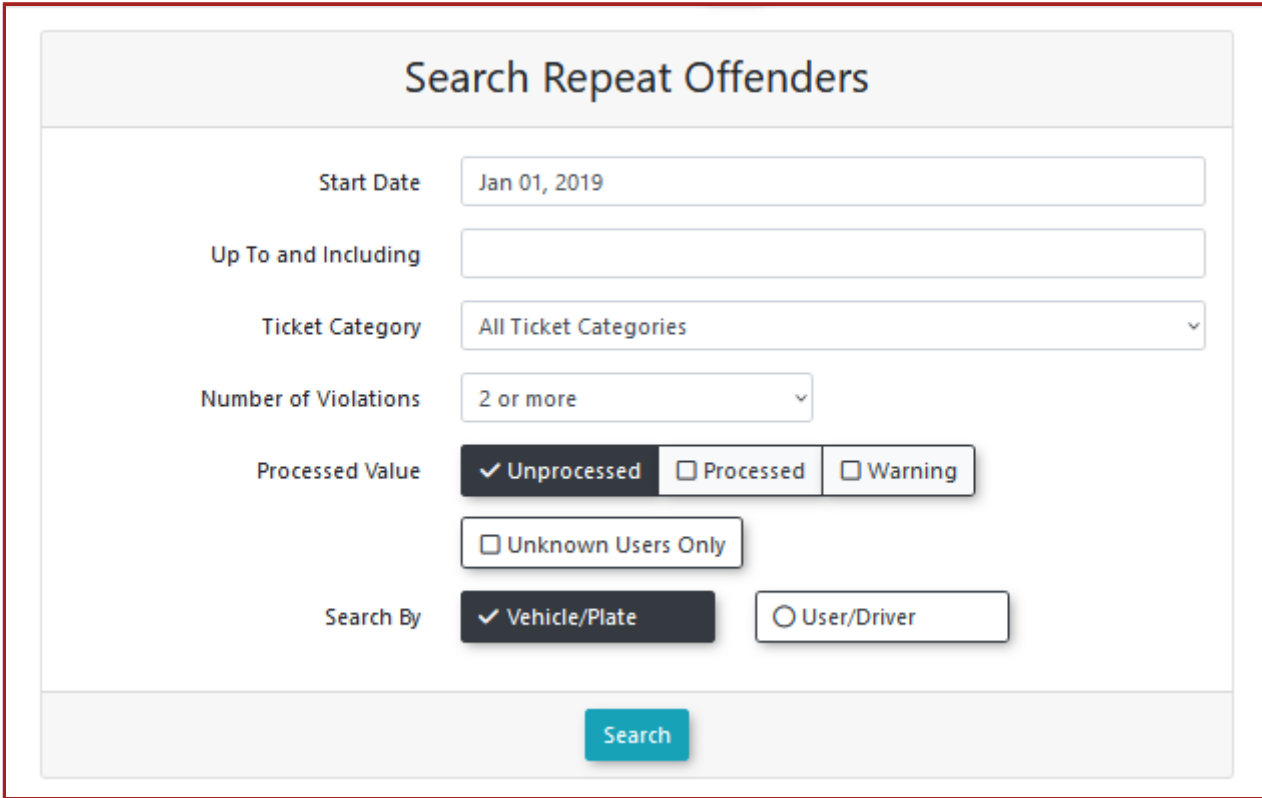

To navigate to the page, look under the menu tree:

- **Violations -> Search Repeat Offenders**

Page Usage

The page will appear as displayed.

The screenshot shows a web form titled "Search Repeat Offenders". The form contains several input fields and checkboxes. The "Start Date" field is set to "Jan 01, 2019". The "Up To and Including" field is empty. The "Ticket Category" dropdown is set to "All Ticket Categories". The "Number of Violations" dropdown is set to "2 or more". The "Processed Value" section has three checkboxes: "Unprocessed" (checked), "Processed", and "Warning". Below this is a checkbox for "Unknown Users Only" which is unchecked. The "Search By" section has two radio buttons: "Vehicle/Plate" (checked) and "User/Driver". A blue "Search" button is located at the bottom center of the form.

Several options are available to narrow the search.

- **Start Date and End Date:** specifies the range in which the violations were received.
- **Ticket Category:** the category of the violation received.
- **Number of Violations:** the min number of violations the user or vehicle has received.
- **Processed Value:** categorizes violations based on their processing status.
 - **Unprocessed:** violations that have not been processed yet.
 - **Processed:** violations that have been paid for and processed.

- **Warning Only:** violations that were marked as a warning instead issuing a fine.
- **Unknown Users Only:** only shows violations assigned to vehicles without a known user tied to them.
- **Search By:**
 - **Vehicle/Plate:** outputs the count of violations tied to license plates. Will not include violations attached directly to a user.
 - **User/Driver:** outputs the count of violations tied to users. Includes violations attached directly to the user and any violations attached to their vehicles. Will not include violations attached to a vehicle with no assigned driver.

Output

The grouping of the output will vary depending on whether it is selected to be output by vehicle or by user.

By Vehicle/Plate

Grouping on the vehicle will show the number of violations on each plate, and any associated drivers of the vehicle.
